10.1071/CHv65n5toc

AUSTRALIAN JOURNAL OF
CHEMISTRY
AN INTERNATIONAL JOURNAL FOR CHEMICAL SCIENCE

Volume 65 Number 5 2012

CONTENTS

RESEARCH FRONT: Physical and Biophysical Chemistry
Guest Editor: Palli Thordarson

Foreword

BIOPHYSCHEM2011: A Joint Meeting of the Australian Society for Biophysics and the RACI Physical Chemistry Division
A. J. Trevitt, J. R. Reimers, R. J. Clarke, J. I. Vandenberg **439**

Highlight

Reduced Bimolecular Recombination in Conjugated Polymer Donor/Fullerene Acceptor Bulk Heterojunction Solar Cells
A. J. Mozer, T. M. Clarke **442**

Review

Molecular Mechanisms of K^+ Selectivity in Na/K Pump
H. Yu, I. Ratheal, P. Artigas, B. Roux **448**

Full Papers

The Bromide–Carbon Monoxide Gas Phase Complex: Anion Photoelectron Spectroscopy and *Ab Initio* Calculations
K. M. Lapere, R. J. LaMacchia, L. H. Quak, M. Kettner, S. G. Dale, A. J. McKinley, D. A. Wild **457**

Coarse-Grained Simulations of the Effects of Chain Length, Solvent Quality, and Chemical Defects on the Solution-Phase Morphology of MEH-PPV Conjugated Polymers
M. Chiu, T. W. Kee, D. M. Huang **463**

Copper Modulation of Amyloid Beta 42 Interactions with Model Membranes
D. K. Weber, J. D. Gehman, F. Separovic, M.-A. Sani **472**

Photochemical Upconversion Enhanced Solar Cells: Effect of a Back Reflector
T. F. Schulze, Y. Y. Cheng, B. Fückel, R. W. MacQueen, A. Danos, N. J. L. K. Davis, M. J. Y. Tayebjee, T. Khoury, R. G. C. R. Clady, N. J. Ekins-Daukes, M. J. Crossley, B. Stannowski, K. Lips, T. W. Schmidt **480**

Theoretical Study of the Oxidation Mechanism of Hematoxylin in Aqueous Solution
M. Namazian, H. R. Zare, M. L. Coote **486**

Reduction of Copper(II) to Copper(I) in the Copper-Curcumin Complex Induces Decomposition of Curcumin
M. H. M. Leung, P. Mohan, T. L. Pukala, D. B. Scanlon, S. F. Lincoln, T. W. Kee **490**

Processing 15-nm Nanodiamonds Containing Nitrogen-vacancy Centres for Single-molecule FRET
J. M. Say, C. Bradac, T. Gaebel, J. R. Rabeau, L. J. Brown **496**

Characterisation of Calmodulin Structural Transitions by Ion Mobility Mass Spectrometry
A. N. Calabrese, L. A. Speechley, T. L. Pukala **504**

Frequency-based Quantum Computers from a Chemist's Perspective
L. K. McKemmish, D. J. Kedziora, G. R. White, N. S. Hush, J. R. Reimers **512**

Communication

Electronic Structure Underlying Colour Differences Between Diarylmethane Dyes and their Azomethine Analogues
S. Olsen **520**

REGULAR PAPERS

Full Papers

DMF/H_2O Volume-Ratio-Controlled Assembly of 2D and 3D Ln-MOFs with 5-(Pyridin-4-yl)isophthalic Acid Ligand
Q. Zhang, F. Hu, S. Wang, D. Sun, D. Wang, J. Dou **524**

Oxygenated Terpenoids from the Australian Sponges *Coscinoderma matthewsi* and *Dysidea* sp., and the Nudibranch *Chromodoris albopunctata*
P. L. Katavic, P. Jumaryatno, J. N. A. Hooper, J. T. Blanchfield, M. J. Garson **531**

Peptide Nucleic Acid Monomers: A Convenient and Efficient Synthetic Approach to Fmoc/Boc Monomers
E. C. Browne, S. J. Langford, B. M. Abbott **539**

Synthesis and Characterization of a Novel Biodegradable Amphiphilic Dendritic Polyether-ester
J. Xiao, H. Wang, Q. Yi, G. Ma, X. Zhang **545**

A Solid State Study of Keto-enol Tautomerism in Three Naphthaledene Schiff Bases
G. K. Pierens, T. K. Venkatachalam, P. V. Bernhardt, M. J. Riley, D. C. Reutens **552**
