

ANIMAL PRODUCTION SCIENCE

CONTENTS Volume 62, Issue 14, 2022, 1303–1438

Sustainable Animal Agriculture for Developing Countries 2019

Foreword

Foreword: Sustainable Animal Agriculture for Developing Countries 2019

Juan Boo Liang i

Review

Feed additives as a strategic approach to reduce enteric methane production in cattle: modes of action, effectiveness and safety

M. Honan, X. Feng, J. M. Tricarico and E. Kebreab 1303–1317

Perspective

The future of smallholder farming in developing countries in the face of climate change: a perspective with a focus on Pakistan

P. C. Wynn, H. M. Warriach, H. Iqbal and D. M. McGill 1318–1329

Research Papers

Meta-analysis of the effect of probiotic-yeast (*Saccharomyces cerevisiae*) intervention on feed intake, feed efficiency and egg-production indices in laying hens

I. P. Ogbuewu and C. A. Mbajorgu 1330–1343

Ruminal microbiota is associated with feed-efficiency phenotype of fattening bulls fed high-concentrate diets

S. Costa-Roura, D. Villalba, M. Blanco, I. Casasús, J. Balcells and A. R. Seradj 1344–1352

Analysis of bacterial community in rumen fluid of cattle supplemented with different protein and energy sources

Nguyen Trong Ngu, Luu Huynh Anh, Nguyen Thi Hong Nhan, Nguyen Van Hon, Nguyen Thiet, Juan Boo Liang, Lam Thai Hung, Nguyen Hong Xuan, Wei Li Chen and Ly Thi Thu Lan 1353–1361

Differences in bacterial diversity across indigenous and introduced ruminants in the Qinghai Tibetan plateau

Xiaodan Huang, Stuart Edward Denman, Jiandui Mi, Jagadish Padmanabha, Lizhuang Hao, Ruijun Long and Christopher S. McSweeney 1362–1370

Bypass fat enhances liveweight gain and meat quality but not profitability of smallholder cattle fattening systems based on oil palm frond

O. Pimpa, B. Binsulong, U. Pastsart, B. Pimpa and J. B. Liang 1371–1378

Comparison of microbial diversity in rumen and small intestine of Xinong Saanen dairy goats using 16S rRNA gene high-throughput sequencing

Cong Li, Yanan Geng, Ping Wang, Huaiping Shi and Jun Luo 1379–1390

Milk fatty acid composition, rumen microbial population and animal performance in response to diets rich in linoleic acid supplemented with *Piper betle* leaves in Saanen goats

R. A. P. Purba, C. Yuangklang, S. Paengkoum and P. Paengkoum 1391–1401

Enhancing bypass starch in cassava chip to sustain growth in goat

S. Renuh, S. C. L. Candyrine, P. Paengkoum, Y. M. Goh, A. Q. Sazili and J. B. Liang 1402–1413

Biological additives improved qualities, *in vitro* gas production kinetics, digestibility, and rumen fermentation characteristics of different varieties of rice straw silage

M. A. Ahmed, M. Y. Rafii, M. Z. Nur Ain Izzati, A. K. Khalilah, E. A. Awad, U. Kaka, S. C. Chukwu, J. B. Liang and A. Q. Sazili 1414–1429

Effect of dietary protein level on egg production and egg-quality characteristics of Japanese quail (*Coturnix coturnix japonica*) in the tropical environment

O. M. A. Jesuyon, A. A. Aganga, M. Orunmuyi and G. T. Falade 1430–1438
