Supplementary Table 11: Aboriginal Cancer Control Plan 2016-2021

Supplementary Table 12: Cancer Framework and Strategic Plan 2010-2013

## Victorian Policy Documents

*Supplementary Table 1: Victorian Cancer Plan 2020-2024*

[illegible]

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
<p>“Activity in the next four years will: build skills in the allied health workforce to understand cancer specific needs, with a focus on regional Victoria and rehabilitation care” p59</p> <p>“Build workforce knowledge and skills in survivorship care across cancer care systems” p17</p>										
<p>“Activity in the next four years will: promote and embed equitable use of survivorship care plans in cancer services and primary and community care services, with a focus on underserved patient groups”</p>										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
p59										
“build capacity in health services research, prevention, screening, supportive care, palliative care and survivorship research “ p71										
Long term goal [2040]: “Increase one- and five-year survival of Victorians with cancer” p2										
“Activity in the next four years will: <ul style="list-style-type: none"> <li>monitor and assess patients’ experiences of care</li> <li>pilot collecting PROMs through the patient experience survey</li> </ul>										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
<ul style="list-style-type: none"> <li>adopt a revised culturally appropriate cancer patient experience survey”</li> </ul> <p>p48 [in treatment section but relevant as about patient experience]</p>										
<p>“Activity in the next four years will:</p> <ul style="list-style-type: none"> <li>develop and pilot quality criteria for supportive care to enable measurement of practice</li> <li>refresh workforce skills and competency in supportive care approaches</li> </ul>										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
including communication skills, motivational interviewing and telemedicine” p56										

*Supplementary Table 2: Victorian Cancer Plan Monitoring and Evaluation Framework: baseline report 2020*

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
“Increase long term quality of life” p13										
“Improve health-related quality of life following primary treatment” p23										
“One and five-year survival rates from all cancers” p21										
“Proportion of patients with local recurrence of primary tumour within two years of surgical										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
resection or curative radiotherapy of a primary tumour”										

Total number of survivorship-related objectives in Victoria n = 12

## New South Wales Policy Documents

*Supplementary Table 3: NSW Cancer Plan*

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
“Facilitate better engagement of primary health care throughout the cancer care continuum, including during treatment” p24										
“Implement strategies, and develop and disseminate tools and resources that support people affected by cancer to appropriately self-manage” p29										
“Develop and disseminate information to support patient decision making about cancer treatment, care and survivorship, appropriate for										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
different levels of health literacy and priority groups”p29										
“Ensure survivorship management after treatment” p29										
“Build stronger links to physical rehabilitation services for people with cancer” p29										
“Facilitate access to psychosocial support for people affected by cancer” p29										
“Develop methods to collect patient experience and patient outcomes to inform the planning and implementation of cancer service										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
improvement activities” p29										
“Patient experience of cancer care” as a performance indicator p31										

Total number of survivorship-related objectives in New South Wales n = 8

## Queensland Policy Documents

*Supplementary Table 4: Cancer care statewide health service strategy 2014*

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
Service direction 1; objective 1.2: “Improve cancer care decision making by involving patients and their general practitioner as active partners in decisions about their care and keeping them and their carers informed throughout their cancer journey” p10										
Objective 1.3: : Continue to promote consistency of care by making evidence-based referral and treatment protocols, guidelines and standards, as well										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
as supporting education that is accessible across the state for all providers” p10										
Objective 1.5: “Continue the implementation of a cancer care coordination model across all services incorporating psycho-social support” p10										
Short term service action: “Evaluate the existing care coordination models, including the implementation or enhancement of psycho-social and peer support, and recommend future development and implementation of a statewide										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
model” p11										
Medium-term service action : “Each service to measure patient satisfaction throughout the patient’s journey including treatment, psycho-social support including peer support, rehabilitation and palliative care. This tool is to include measures for assessing involvement in patient-centred decision making, account for patient preferences, access to evidence-based information and education resources” p11										
Service direction										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
2; Short term service action: “Continue to improve relationships and partnerships with primary care providers in developing integrated or shared care service delivery” p13										
Medium-term service action: “Work with non-government organisations to further develop support services for cancer patients, survivors and their families, building on existing successful models” p13										
Service direction 3; objective 3.5: “Reduce variations in cancer										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
outcomes in Queensland between metro, regional and rural areas as well as between socio-economic groups” p14										
Service direction 3; objective 3.6: “Improve access to support programs for cancer survivors, including young people living with cancer and their families” p14										
Short term service action: “Evaluate and build upon cancer support services in the acute setting, together with community organisations to further improve or enhance access to cancer survival										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
resources, and support and self-management programs (with emphasis on young people living with cancer and their families)” p15										
<p>Medium term service action:  “Regularly review referral pathways to include, where possible, the adoption of appropriate shared care models which:</p> <ul style="list-style-type: none"> <li>enables patients to benefit from ongoing monitoring and treatment as close to home as possible—such as those living in regional,</li> </ul>										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
rural and remote areas” p15										
Medium term service action: “Implement strategies to enhance patient access to evidence-based resources about cancer survival and self-management programs—in particular implement strategies to promote awareness to young people living with cancer of the late side effects of treatment, and second malignancies or other chronic diseases which can develop in adult										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
life” p15										
Service direction 4; Objective 4.4: “Improve the identification of workforce requirements to support models of care that combine hospital inpatient and outpatient care, multidisciplinary teams and other care services” p17										
Medium Term Service Action: “Review and strengthen cancer workforce skills— at all levels—with a focus on enhancing regional and rural services to manage and treat patients close to home where it safe and sustainable (such as chemotherapy										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
and surgical-oncology), on improving quality of care, and improving outcomes for patients” p18										
Long term service action: “Explore and implement alternative models of care to enable better use of scarce clinical skills e.g. nurse-led clinics, nurse practitioners, radiation therapy and other allied health models” p19										
“Improved five year relative survival rate for all invasive cancers for the Queensland population and the five year relative survival										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
rate remains better than the Australian rate” (criteria for success; p21)										

Total number of survivorship-related objectives in Queensland n = 16

## Northern Territory Policy Documents

*Supplementary Table 5: NT Cancer Care Strategy 2018-2022*

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
“Provide Territory-wide contemporary patient care, including for all stages of cancer management - awareness and prevention, diagnosis, treatment and follow up, supportive care, survivorship and end of life care” (p17, priority 1)										
“Explore and develop allied health service provision for oncology patients in TEHS and CAHS, across the care continuum from diagnosis/pre-treatment										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
through acute inpatient admission and long-term outpatient follow-up” (page 17, priority 1)										
“Improve access, services and facilities offered in survivorship including integration of monitoring with involvement of general practitioners, other PHC providers and specialists, wellbeing services, psychosocial and community support” p17										
“Increase the competent and effective use of telehealth in all										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
health settings to allow treatment and follow up to be offered as close to home as possible” p18										
“Patient journey satisfaction rate” as an evaluation indicator to evaluate the quality of person centred care and communication through NT cancer, services p19										
“Identify ways to create a specialist workforce in NT for all aspects of cancer care including support of survivorship and grief counselling” p21 (priority 3, workforce development)										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
<p>“Promote strategies to recruit, engage, develop and retain Aboriginal workforce in cancer care to enhance the Aboriginal patient’s navigation through the cancer journey”</p> <p>p21</p>										

Total number of survivorship-related objectives in the Northern Territory n = 7

## Western Australian Policy Documents

*Supplementary Table 6: WA Cancer Plan 2020-2025*

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
“Actively engage primary and community care practitioners as key care providers across the cancer pathway” p22 (strategy under priority 2)										
“Empower cancer survivors to live well” p11, 28 (objective under priority 3)										
“Enhance provision of culturally secure supportive care, communication and information for Aboriginal people, their family, carers and community across the cancer continuum” p28										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
(strategy under priority 3)										
“Co-develop and implement Survivorship Care Plans and Treatment Summaries in partnership with cancer survivors” p28 (strategy under priority 3)										
“Empower cancer survivors to access appropriate services to self-manage the long-term effects of cancer and to engage in healthy lifestyle behaviours” p28 (strategy under priority 3)										
“Establish transparent public reporting of patient										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
reported experience and outcomes and monitoring of systemwide performance indicators” p28 (strategy under priority 3)										

*Supplementary Table 7: WA Cancer Plan 2020-2025 priorities for implementation*

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
“Establish a hub of survivorship expertise to support consumers with complex health care needs and health care professionals as a part of a stratified approach to provision of information and supportive care” (in Phase 1 under Consumer										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
Information, support, transitional and survivorship care) p4										
“Establish an Aboriginal Cancer Nurse Coordinator to coordinate care for Aboriginal people with complex cancer care needs” (in Phase 1 under Consumer Information, support, transitional and survivorship care) p4										
“Design and implement tailored treatment summaries for cancer survivors” (in Phase 2 under Consumer Information, support, transitional and										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
survivorship care) p4										
“Develop a policy on use of co-designed, tailored survivorship care plans for cancer survivors” (in Phase 2 under Consumer Information, support, transitional and survivorship care) p4										
“Develop cancer specific HealthPathways for General Practitioners in conjunction with consumers and clinicians, especially for cancer survivorship and psychosocial care” (in Phase 2 under Consumer Information,										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
support, transitional and survivorship care) p4										
“Co-design and roll-out a patient held cancer care record to improve sharing of patient-level information between cancer care providers” (in Phase 3 under Consumer Information, support, transitional and survivorship care) p4										
“Address variations in access to services against the framework for cancer-related psycho-social services” (in Phase 3 under Consumer Information,										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
support, transitional and survivorship care) p4										
“Establish a statewide survivorship clinic for adult survivors of childhood cancer that is staffed by a survivorship physician and/or a survivorship nurse practitioner who can coordinate referrals to required services” (in Phase 3 under Consumer Information, support, transitional and survivorship care) p4										
“Develop and roll-out an annual PREMS collection for those affected by										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
cancer using internationally recognised and consumer endorsed measures” (Phase 2 under Cancer data) p5										
“Embed the routine collection of PROMS across cancer clinical settings” (Phase 2 under Cancer data) p5										
“Develop a roadmap and business case based on the findings of the statewide cancer data strategy that includes (but is not limited to) survivorship data, genetic fields, linked PathWest and Genetic Services data” (Phase 2 under										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
Cancer data) p5										
“Promote culturally appropriate cancer resources for cancer survivors” (Phase 3 under Multidisciplinary Teams and Optimal Care Pathways) p8										

*Supplementary Table 8: WA Country Health Service Cancer Strategy 2017-2022*

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
“Patients are provided with a treatment summary and follow-up care plan post treatment” (outcome under direction 2) p11										
“Survival rates after five years” as a key performance indicator (p17, appendix)										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
“Quality of life: maintain and improve the quality of life for country people with cancer” with a target of “80% of patients report satisfactory quality of life” as a key performance indicator (p17, appendix)										

Total number of survivorship-related objectives in Western Australia n = 21

## South Australian Policy Documents

*Supplementary Table 9: Statewide Cancer Control Plan 2011-2015*

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
“Programs that maintain the skills and competencies of the cancer workforce across metropolitan and country areas are implemented” p3, p38										
“Information systems are in place to collect data to monitor and evaluate cancer outcomes” p3, 45 (recommendation)										
“the cancer workforce, which includes professionals, volunteers, and carers, is adequate across the spectrum of cancer control” p38 (goal)										
“cancer control										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
workers are able to participate in accredited continuing education programs and are equipped to participate in research projects to enhance cancer control” p38 (goal)										
“good quality research and evaluation is made integral to the whole cancer control pathway and underpins all cancer control programs and services” p48 (goal)										

*Supplementary Table 10: Statewide Survivorship Framework*

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
“Identify and address cancer survivor needs” p5										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
13 (key objective)										
“Enable equity of access to survivorship care regardless of age, gender, tumour type, geographical location, co-morbidities” p13										
“Provide a minimum level of care for survivors” p13										
“Assist survivors to self-manage their care where appropriate” p13										
“Enable well-coordinated, best-practice care for cancer survivors” p5, 13 (key objective)										
“Provide timely communication between service providers and consumers” p13										
“Facilitates the care of cancer										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
survivors across health care services, settings and locations” p13										
“Ensure each cancer survivor has a cancer treatment summary and survivorship care plan” p13 Minimum standard of survivorship care: “all cancer survivors receive a cancer treatment summary and individualised survivorship care plan (informed by a needs assessment) following completion of definitive treatment or adjuvant therapy” p5, 24										
Recommended										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
standard of survivorship care: “The development of a cancer treatment summary and survivorship care plan should be commenced from the point of diagnosis and regularly updated (including needs assessment) throughout treatment and beyond for all cancer survivors” p5, 24										
“Monitor and continuously improve care for cancer survivors” p5, 13 (key objective)										
“Measure patient reported experience” p13										
“Use sustainable technology to										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
collect data, including health economic data for monitoring and evaluation” p13										
“Use knowledge gained from monitoring and evaluation for future planning” p13										
“Raise awareness of the importance of delivering survivorship care as outlined in this Framework across all levels (from policy to individual service providers)” p13										
“Identify Champions to embed the Framework in health care services” p13										
“Provide information to consumers to										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
support adoption of the Framework” p13										
An initial key performance indicator (KPI): “the number of cancer survivors with a Survivorship Care Plan developed and documented” (p5, 20)										
Recommended future KPI :the “number of cancer survivors with reported unmet needs” (p5, 20) with “distress thermometer and problem checklist” used as needs assessment tool (p6)										
Consideration and monitoring of health economics in the future including										

OBJECTIVES MENTIONED IN PLAN	Raise awareness of cancer survivorship	Development of survivorship care plan	Evidence based clinical practice guidelines	Development and implementation of quality measures for survivorship care	Coordinated care; models of survivorship care	Development of comprehensive cancer control plans	Health care/workforce expansion and education	Employment related concerns	Adequate and affordable health insurance	Investing in survivorship research
<ul style="list-style-type: none"> <li>• “cost of current models of survivorship care prior to implementation of the Framework over a finite period of time”</li> <li>• “cost of survivorship care with the implementation of the Framework over a finite period of time”</li> <li>• “Value-added to care with the introduction of the Framework, specifically the provision of the key components from perspective of the consumer</li> </ul>
