

ANIMAL PRODUCTION SCIENCE

CONTENTS Volume 57, Issue 12, 2017, 2325–2512

MANIPULATING PIG PRODUCTION XVI

PROCEEDINGS OF THE 16th BIENNIAL CONFERENCE OF THE AUSTRALASIAN
PIG SCIENCE ASSOCIATION (APSA)

Preliminary Material i–xlii

Chapter 1: The A. C. Dunkin Memorial Lecture

Seasonal infertility in pigs: what have we achieved and where are we up to?

R. H. King 2325–2330

Chapter 2: Symposia – What consumers want

Consumers want pork with ‘adjectives’

D. N. D’Souza, D. Cleary and R. J. E. Hewitt 2331–2338

Innovation in an expanding market: Australian pork is not a commodity

*E. P. Bittner, H. Ashman, M. Hastie, R. J. van Barneveld, A. H. Hearn,
N. Thomson and F. R. Dunshea* 2339–2344

What are they thinking? Consumer attitudes to meat production in Australia

H. J. Bray, E. A. Buddle and R. A. Ankeny 2345–2352

Chapter 3: Symposia – Genetics

What does the ‘closed herd’ really mean for Australian breeding companies and their customers?

K. L. Bunter and S. Hermes 2353–2359

The role of genomics in pig improvement

D. J. Garrick 2360–2365

Genetic improvement and dissemination for the global commercial swine industry

M. S. Culbertson, W. O. Herring, J. W. Holl and D. Casey 2366–2369

Chapter 4: Reviews

Neurophysiological assessment of animal welfare

A. J. Tilbrook and C. R. Ralph 2370–2375

Novel marine polysaccharides and maternal nutrition to stimulate gut health and performance in post-weaned pigs

J. V. O’Doherty, M. A. Bouwhuis and T. Sweeney 2376–2385

Guaranteeing consistently high quality Australian pork: are we any closer?

H. A. Channon, D. N. D’Souza and F. R. Dunshea 2386–2397

Current and future antimicrobial resistance issues for the Australian pig industry

S. Abraham, M. O’Dea, S. W. Page and D. J. Trott 2398–2407

Chapter 5: Contributed abstracts – Nutrition, growth performance, heat stress and gut health

Mannitol and galactose as markers of gastrointestinal tract morphology in pigs after gradual or conventional weaning

D. L. Turpin, P. L. Langendijk and J. R. Pluske 2408–2408

Dietary fibre improved ileal morphology without reducing ileal digestibility in weaned pigs housed in an inferior environmental condition

T. K. Shin, H. M. Cho, S. S. Wickramasuriya, E. Kim, S. K. Lee and J. M. Heo 2409–2409

Increasing dietary tryptophan and decreasing other large neutral amino acids increases weight gain and feed intake in weaner pigs infected with *Escherichia coli*

S. O. Sterndale, D. W. Miller, J. P. Mansfield, J. C. Kim and J. R. Pluske 2410–2410

Effects of feeding conjugated linoleic acid (CLA) and medium chain fatty acids (MCFA) to gilts and sows on survival of their progeny

J. R. Craig, F. R. Dunshea, J. J. Cottrell, E. M. Ford, U. A. Wijesiriwardana and J. R. Pluske 2411–2411

continued on next page

Dietary essential oil volatiles are transferred to milk and amniotic fluid in sows

R. Palou, S. Fuller and E. Roura 2412–2412

Effects of different amounts of wheat bran and oat hulls on production of short chain fatty acids in the hindgut of pigs

V. Ratanapaul, D. Zhang, S. Diffey, J. L. Black, M. J. Gidley and B. A. Williams 2413–2413

Effects of L-citrulline supplementation on lactation performance of sows in summer

F. Liu, E. M. de Ruyter, R. Z. Athorn, C. J. Brewster, D. J. Henman, J. J. Cottrell and F. R. Dunshea 2414–2414

The effect of heat stress on respiratory alkalosis, blood acid base balance and insulin sensitivity in cinnamon supplemented pigs

J. J. Cottrell, F. Liu, S. Wan, U. A. Wijesiriwardana, K. DiGiacomo, F. Kelly, P. Celi, B. Leury, I. J. Clarke and F. R. Dunshea 2415–2415

Dietary phytate, calcium and phytase levels affect mineral utilisation in weaned pigs

P. Guggenbuhl, R. Aureli and E. Perez Calvo 2416–2416

Potential of blood biomarkers to estimate optimum amino acid requirements for pig growth

E. A. Soumeh, M. S. Hedemann, E. Corrent, J. van Milgen and J. V. Nørgaard 2417–2417

Factors influencing the measure of creatinine in non-reproductive pigs

T. L. Muller, R. J. E. Hewitt, D. N. D'Souza and R. J. van Barneveld 2418–2418

Effects of dietary Ca and digestible P concentrations and addition of phytase on growth performance of nursery pigs

F. Wu, M. D. Tokach, J. M. DeRouchey, S. S. Dritz, J. C. Woodworth and R. D. Goodband 2419–2419

The expression of bitter taste receptors (T2Rs) in the porcine gastrointestinal tract epithelium and smooth muscle

N. Tang, V. Ting, M. Fu and E. Roura 2420–2420

Importance of connectivity grains for AusScan NIR prediction accuracy

J. L. Black and S. Diffey 2421–2421

A double-choice model to quantify negative preference to bitterness in pigs

J. Wang, M. Fu, M. Navarro and E. Roura 2422–2422

Preference thresholds for four limiting essential amino acids in piglets

M. Muller, S. Diffey and E. Roura 2423–2423

Effects of standardised total tract digestible phosphorus on performance, carcass characteristics, and economics of 24 to 130 kg pigs

C. M. Vier, F. Wu, M. B. Menegat, H. Cemin, S. S. Dritz, M. D. Tokach, M. A. D. Goncalves, U. A. D. Orlando, J. C. Woodworth, R. D. Goodband and J. M. DeRouchey 2424–2424

Saccharomyces cerevisiae boulardii improves performance of pigs fed low and high energy diets in summer

C. J. Brewster, D. J. Henman, E. M. de Ruyter, A. J. Turney and F. Bravo de Laguna 2425–2425

Cooling innovations for loose farrowing pens in summer

R. S. Morrison, J. N. E. Hogg, J. Hales, E. M. Baxter and V. A. Moustsen 2426–2426

Dietary cellulose could reduce cytokine responses without compromising growth performance in weaner pigs under a farm-like circumstance

H. M. Cho, S. S. Wickramasuriya, T. K. Shin, E. Kim, S. K. Lee and J. M. Heo 2427–2427

Dietary phytate, calcium and phytase levels affect growth performance in weaned pigs

P. Guggenbuhl, R. Aureli and E. Perez Calvo 2428–2428

Dietary phytate, calcium and phytase levels affect the small intestine and plasma *myo*-inositol concentrations in weaned pigs

P. Guggenbuhl, R. Aureli and E. Perez Calvo 2429–2429

Enhanced *E. coli* phytase at 2500 FTU improved piglet performance in both animal and plant protein-based diets

D. J. Henman, K. O'Halloran, J. N. E. Hogg, P. Wilcock, R. A. H. M. ten Doeschate and J. C. Kim 2430–2430

Alternative milk derivatives do not reduce weaner pig performance

R. J. E. Hewitt, S. M. Tritton, D. N. D'Souza and R. J. van Barneveld 2431–2431

Levan-type fructan improved growth performance and nutrient digestibility of weaner pigs

X. J. Lei, J. H. Park, D. H. Baek, H. M. Yun and I. H. Kim 2432–2432

Using hydroxyl selenomethionine as an antioxidant for weaned piglets

Y. G. Liu 2433–2433

In vivo digestion of encapsulated essential oils in weaned pigs

R. Palou, B. Bhandari, C. Castro and E. Roura 2434–2434

Elucidation of the complex carbohydrate structures of canola meal fibre by commercial feed enzymes

N. R. Pedersen, K. Stamatopoulos, D. Pettersson, K. A. Kristensen and J. L. Ravn 2435–2435

Effects of different amounts of wheat bran and oat hulls in a starch-based diet on voluntary feed intake in grower pigs

V. Ratanpaul, D. Zhang, B. A. Williams, S. Diffey, J. L. Black and M. J. Gidley 2436–2436

Effects of dietary supplementation of *Curcuma aromatica* and inositol monophosphate on performance and IgG of blood in lactating sows and piglets

H. Y. Sun, J. K. Kim and I. H. Kim 2437–2437

NSP-ase and phytase improve growth performance and upholds carcass traits

D. Wu and Y. G. Liu 2438–2438

Chapter 6: Contributed abstracts – Lactation and welfare

The reproductive value of enrichment to sows at farrowing

R. E. Doyle, C. R. Ralph, L. E. Edwards, R. S. Morrison, G. M. Cronin and K. J. Plush 2439–2439

A preliminary examination of sham chewing behaviour in group-housed, nulliparous sows

L. M. Hemsworth, R. Y. Acharya and P. H. Hemsworth 2440–2440

Influence of access to maize silage on sham chewing and stomach ulcer of gestating sows

L. U. Hansen, G. Sørensen and C. F. Hansen 2441–2441

Agonistic interactions in stable group housed swine using a Gestal® free access stall over two gestation periods

M. D. Pairis-Garcia and M. R. Campler 2442–2442

Group lactation compromises piglet performance and shifts injuries from weaning to lactation

D. S. Lines, J. S. Huser, S. H. Hallett, K. J. Plush and A. Martyniuk 2443–2443

Confinement of sows at parturition increases the incidence of behaviours thought to indicate pain

T. L. Nowland, W. H. E. J. van Wetters and K. J. Plush 2444–2444

Nurse sows display altered reproduction in the next gestation

J. G. Alexopoulos, D. S. Lines and K. J. Plush 2445–2445

Farrowing performance of sows with increased magnesium concentrations in a transition diet

K. J. Plush, D. S. Lines, J. S. Huser, S. H. Hallett and W. H. E. J. van Wetters 2446–2446

Play behaviour in piglets is infrequent and not altered by enrichment with lucerne when measured by scan sampling

J. Zemitis, K. J. Plush, C. R. Ralph, R. S. Morrison, S. Hazel and R. E. Doyle 2447–2447

Strategies to reduce the pain of tail docking in piglets

R. S. Morrison, N. J. Kells, C. B. Johnson and P. H. Hemsworth 2448–2448

Provision of enrichment blocks alters red blood cell parameters in sucker and weaner pigs

S. A. Barnes, S. Kitessa, G. M. Cronin and C. R. Ralph 2449–2449

Group-lactation housing from 7 or 14 days post-partum: effects on piglet behaviour

M. Verdon, R. S. Morrison and J.-L. Rault 2450–2450

Effect of L-glutamine in late gestation sow diets on survivability and growth of piglets

R. Z. Athorn, A. R. Wilkinson and D. J. Henman 2451–2451

Pre-weaning growth of gilt and sow progeny is not improved by feeding conjugated linoleic acid and medium chain fatty acids during gestation

J. R. Craig, F. R. Dunshea, J. J. Cottrell, E. M. Ford, U. A. Wijesiriwardana and J. R. Pluske 2452–2452

Piglet birth weight is related to time to first walk after birth

M. E. Quinn and R. S. Morrison 2453–2453

Oxytocin delivered intranasally to gilts immediately after the birth of the first piglet decreased colostrum intake and growth of piglets

C. R. Ralph, K. J. Plush and J.-L. Rault 2454–2454

Effect of maternal creatine supplementation prior to parturition on piglet growth and survival prior to weaning

W. H. E. J. van Wetters and B. A. Dearlove 2455–2455

continued on next page

The effects of provided enrichment in the sucker phase on piglet scratch score post-weaning

L. A. McKenny, G. M. Cronin, M. L. Hebart, K. J. Plush and C. R. Ralph 2456–2456

Amino acid complexed minerals in the diet increased mineral content in the hair and hoof of growing gilts

T. L. Muller, R. J. E. Hewitt, D. N. D'Souza and R. J. van Barneveld 2457–2457

A poured block reduces feeding associated aggression in sows during gestation

T. L. Muller, M. J. Callaghan, R. J. E. Hewitt, D. N. D'Souza and R. J. van Barneveld 2458–2458

Sucker and weaner pigs prefer brick shaped enrichment blocks over cube or wedge shaped enrichment blocks

C. R. Ralph, J. A. Winfield, G. F. Macnamara, B. L. F. Macnamara, C. O'Shea, E. J. S. Hall and G. M. Cronin 2459–2459

The provision of lucerne to sows evoked greater arousal in response to an anticipatory behaviour test

C. R. Ralph, K. J. Plush, S. Hazel, J. Zemitis and R. E. Doyle 2460–2460

Group-lactation housing from 7 or 14 days post partum: effects on sow behaviour

M. Verdon, R. S. Morrison and J.-L. Rault 2461–2461

Efficiency to complete the maze test is decreased in young pigs enriched during the sucker phase

J. Zemitis, G. M. Cronin, M. L. Hebart and C. R. Ralph 2462–2462

Chapter 7: Contributed abstracts – Reproduction, genetics and environment

Seasonal effects can be separated from other challenges in the pig environment using time series analysis

S. Z. Y. Guy, L. Li, P. C. Thomson and S. Hermes 2463–2463

Modifying procedures to assess immune competence in mature boars

J. Harper, K. L. Bunter, S. Hermes, B. C. Hine and A. M. Collins 2464–2464

Breeder dam parity does not affect lifetime reproductive performance

R. J. E. Hewitt, D. N. D'Souza and R. J. van Barneveld 2465–2465

Early lifetime performance parameters affecting selection and reproductive success in gilts

R. Z. Athorn, K. L. Bunter and J. R. Craig 2466–2466

Caffeine increases gestation length on a commercial farm

B. A. Dearlove, A. C. Weaver, K. L. Kind, K. L. Gatford and W. H. E. J. van Wettere 2467–2467

Sow dimensions increase with increasing parity but not with increasing litter size

V. A. Moustsen, M. B. F. Nielsen, S. E. Nielsen and A. R. Kristensen 2468–2468

A single intravenous injection of Kisspeptin evokes an increase in luteinising hormone in 15- and 18-week-old gilts

C. R. Ralph, R. N. Kirkwood and A. J. Tilbrook 2469–2469

Lifetime sow productivity is influenced by both body protein and body fat reserves after first-litter weaning

R. J. Smits, M. V. Tull and K. L. Bunter 2470–2470

Effect of parity and stage of gestation on maternal growth and feed efficiency of gestating sows

L. L. Thomas, R. D. Goodband, M. D. Tokach, J. C. Woodworth, J. M. DeRouchey and S. S. Dritz 2471–2471

Development of non-invasive methods to monitor the transfer of dietary volatile compounds in pigs

C. Castro, S. Fuller, M. Navarro, R. Palou and E. Roura 2472–2472

Predicting oestrus and ovulation in sows using the vulva, cervical mucus and body temperature

D. Glencorse, C. G. Grupen and R. Bathgate 2473–2473

The pre-ovulatory luteinising hormone surge is affected by the sex ratio of a gilt's birth litter

J. Seyfang, R. N. Kirkwood, A. J. Tilbrook and C. R. Ralph 2474–2474

The effects of the *in utero* environment on gilt performance

L. M. Staveley, K. L. Kind, J. Kelly and W. H. E. J. van Wettere 2475–2475

Can serum levels of anti-Müllerian hormone and oestradiol in juvenile gilts be used to predict future reproductive performance?

A. N. Steel, R. Z. Athorn and C. G. Grupen 2476–2476

Commercial evaluation of a mating in lactation protocol

R. Z. Athorn and J. A. Downing 2477–2477

Melatonin fed in early gestation increases fetal weight

B. A. Dearlove, K. L. Kind, K. L. Gatford and W. H. E. J. van Wettere 2478–2478

Aerobic and algal treatment for piggery effluent and water reuse: design of an integrated wastewater treatment plant
N. N. Cheng and H. J. Fallowfield 2479–2479

Assessing the suitability of microalgae biomass produced from piggery waste as a fertiliser
S. N. Jenkins, C. A. Paredes-Valdivia, I. S. Waite, J. Ayre, N. Moheimani, L. Barton and L. K. Abbott 2480–2480

Effect of feed wastage on piggery effluent characteristics
A. G. Skerman, S. Willis, D. J. Batstone, S. D. Yap and S. Tait 2481–2481

The effect of dam parity on growth, white blood cell count, haemoglobin and immunoglobulin levels of weaner pigs
S. Hermes, T. McKenna, M. M. Bauer and N. Sales 2482–2482

The effect of parity on haemoglobin levels in sows prior to farrowing and in 1-day-old piglets
B. L. Hollema, G. J. Davis and S. Hermes 2483–2483

The effects of selecting growing pigs for a high growth rate and low backfat on sow characteristics
B. L. Hollema, G. J. Davis and S. Hermes 2484–2484

Predicting body protein and body fat for breeding sows of a modern commercial genotype
R. J. Smits, W. C. Morley and K. L. Bunter 2485–2485

Chapter 8: Contributed abstracts – Meat eating quality and food safety

The effect of pre-slaughter factors on meat quality varies between muscle cuts
A. K. Lealiifano, D. N. D'Souza, F. R. Dunshea and R. J. Smits 2486–2486

The incidence of pale soft exudative pork in entire male pigs from an Australian herd
C. G. Jose 2487–2487

Prevalence survey of *Toxoplasma gondii* in hearts from Western Australian sows
K. Hodgson, J. Tan, V. Torok, G. Holds and D. Hamilton 2488–2488

Deep litter housed pigs have a faster pH decline compared to conventional housed pigs
A. K. Lealiifano, D. N. D'Souza, F. R. Dunshea and R. J. Smits 2489–2489

Development of an algorithm to correlate Physi-Trace pig liver data with pork meat data
R. J. Watling, H. A. Channon and G. S. H. Lee 2490–2490

Chapter 9: Contributed abstracts – Antimicrobial resistance and health

Reduced antimicrobial resistance in weaner pigs treated with Detach® following natural challenge with F4 *Escherichia coli*
A. M. Collins and B. G. Bowring 2491–2491

The emergence of community associated MRSA (ST93) in piggery workers and associated risk factors
S. Sahibzada, M. Hernández-Jover and J. Heller 2492–2492

Disinfectant susceptibility in south east Australian pig herds
L. K. van Breda and M. P. Ward 2493–2493

Investigation of a novel porcine bacterium by whole genome sequencing and mouse inoculation
A. E. Watt, M. S. Marenda and G. F. Browning 2494–2494

Haptoglobin in oral fluid samples from pens of pigs can potentially be used to estimate herd inflammatory status
J. C. Kim, D. L. Turpin and J. R. Pluske 2495–2495

Novel feed additives controlling *Salmonella typhimurium* in pigs
J. Allaart, C. Silva, M. van der Heijden and P. Roubos-van den Hil 2496–2496

Lactobacillus acidophilus fermentation product as an alternative to therapeutic zinc oxide in weaned pig diets on performance and response to *Escherichia coli* challenge
X. Guan, B. E. Bass, P. J. van der Aar, C. Piñeiro, J. W. Frank, J. Morales, F. Molist and D. J. Cadogan 2497–2497

Effect of the combination of three yeast strains on post weaning piglets after an experimental *E. coli* infection
X. Guan, F. Molist, F. Bravo de Laguna and D. Saornil 2498–2498

Pen hygiene and piglet mortality in farrowing pens with partly solid floor, changes through lactation
J. Hales, A. Norval, M. B. F. Nielsen and V. A. Moustsen 2499–2499

Topical zinc oxide improves shoulder lesion healing compared with other treatments
S. H. Hallett, J. S. Huser, K. J. Plush and D. S. Lines 2500–2500

Microencapsulated feed additives allow improved production efficiency in weaner pigs
R. J. E. Hewitt, W. Bradshaw and L. Lahaye 2501–2501

continued on next page

Zinc oxide presentation can influence weaner performance

R. J. E. Hewitt, S. M. Tritton, D. N. D'Souza and R. J. van Barneveld 2502–2502

A comparative study of the efficacy of Detach[®] versus zinc oxide to control post-weaning diarrhoea in pigs

P. K. Holyoake and T. L. Mynott 2503–2503

Effects of microencapsulated organic acids and essential oils supplementation on performance and rectal temperature in challenged weaning pigs

S. D. Liu, W. Yun, J. H. Lee, W. G. Kwak, H. J. Oh, C. H. Lee and J. H. Cho 2504–2504

Effect of probiotic and xylanase on growth performance, nutrient digestibility, blood profiles, and faecal microflora in growing pigs

D. H. Nguyen, H. N. Tran, K. Y. Lee and I. H. Kim 2505–2505

In vitro antimicrobial activity of essential oils against enterotoxigenic *Escherichia coli* found in a nation-wide commercial farm survey

R. Palou, C. Turni and E. Roura 2506–2506

Cereal and protein sources fed to pigs after weaning influence faecal shedding of β -haemolytic *Escherichia coli*

J. R. Pluske, B. P. Mullan and J. C. Kim 2507–2507

A potential new species of porcine *Actinobacillus* defined by multi-locus sequence analysis

C. Turni, N. Giang, Y. Wu, P. Blackall and H. Christensen 2508–2508

Effects of a multi-strain probiotic on growth performance and faecal microflora in weaner pigs

H. Shi, S. T. Upadhaya, X. X. Liang, S. Q. Huang, X. Z. Hao and I. H. Kim 2509–2509

Does dietary supplementation of gamma-aminobutyric acid improve performance in weaner pigs experimentally infected with *Escherichia coli* and given adrenocorticotrophic hormone?

S. O. Sterndale, D. W. Miller, J. P. Mansfield, J. C. Kim and J. R. Pluske 2510–2510

Chapter 10: Index of Authors 2511–2512
