Review
Agroforestry for ruminants: a review of trees and shrubs as fodder in silvopastoral temperate and tropical production systems
Sophie Vandermeulen, Carlos Alberto Ramírez-Restrepo, Yves Beckers, Hugues Claessens and Jérôme Bindelle 767–777

Genetics and Genomics
Polymorphisms of kappa-casein gene and their effects on milk production traits in Holstein, Jersey and Brown Swiss cattle
Murad Gurses, Huseyin Yuce, Ebru Onalan Etem and Bahri Patir 778–784
Bayesian estimates of genetic relationship between calving difficulty and productive and reproductive performance in Holstein cows
Navid Ghavi Hossein-Zadeh, Mohammad Hossein Salimi and Abdol Ahad Shadparvar 785–790
Litter size at lambing influences genetic evaluation of maternal rearing ability
Kim L. Bunter, Andrew A. Swan, Daniel J. Brown, Forbes D. Brien and Jennifer Smith 791–800

Nutrition and Metabolism
Bone mineral density in the tail-bones of cattle: effect of dietary phosphorus status, liveweight, age and physiological status
Effect of quantity and source of rumen nitrogen on the efficiency of microbial protein synthesis in steers consuming tropical forage
M. K. Bowen, D. P. Poppi and S. R. McLennan 811–817
Growing goats of different sexes have distinct metabolic responses to continuous feed restriction
Relationship between the fatty acid composition of uropygial gland secretion and blood of meat chickens receiving different dietary fats
Khaled Kanakri, Beverly Muhlhausler, John Carragher, Robert Gibson, Reza Barekatain, Carolyn Dekoning, Kelly Drake and Robert Hughes 828–833

Feed Quality, Nutritional Value and Toxicology
Effect of replacing a commercial pelleted calf meal with lucerne leaf-meal on performance of neonatal and transitional Holstein heifer calves
Joyce L. Marumo, Florence V. Nherera-Chokuda, Jones W. Ng’ambi and Mukengela C. Maya 834–840
Comparison of ruminal fermentation parameters, fatty acid composition and flavour of beef in finishing bulls fed active dry yeast (Saccharomyces cerevisiae) and yeast culture
Effects of partially replacing barley with sugar beet pulp, with and without roasted canola seeds, on performance, rumen histology and fermentation patterns in finishing Arabian lambs
S. Asadollahi, M. Sari, N. Erafanimajd, M. Chaji, M. Mamoui and A. Kiani 848–855
Production responses in young bulls fed glycerine as a replacement for concentrates in feedlot diets

Continued on next page
Rumen-buffering capacity using dietary sources and in vitro gas fermentation
Sungchhang Kang and Metha Wanapat 862–870

Phosphorus supplementation with or without other minerals, ionophore and antibiotic did not affect performance of Nellore bulls receiving high-grain diets, but increased phosphorus excretion and dietary costs

Methionine supplementation of low-protein diet and subsequent feeding of low-energy diet on the performance and blood chemical profile of broiler chickens
P. Jariyahathakij, B. Chomtee, T. Poeikhampha, W. Loongyai and C. Bunchasak 878–885

Feed efficiency and enteric methane production of Nellore cattle in the feedlot and on pasture

Associative effects between Arachis pintoi and dwarf elephantgrass hays on nutritional value in sheep
A. C. Dall-Orsoletta, T. Reiter, G. V. Kozloski, V. Niderkorn and H. M. N. Ribeiro-Filho 894–899

The use of certain medicinal plant extracts reduced in vitro methane production while improving in vitro organic matter digestibility
Abiodun M. Akanmu and Abubeker Hassen 900–908

Behaviour, Well-being and Health

Assessing and mitigating post-operative castration pain in Bos indicus cattle
M. Laurence, A. Barnes, T. Collins, T. Hyndman and G. C. Musk 909–919

Performance and behaviour of Nellore steers on integrated systems

Early mother–young relationship and feeding behaviour of lambs are unaffected by low pasture allowance until the beginning of the last third of gestation in single-bearing ewes

Environment, Production Systems and Management

Revised greenhouse-gas emissions from Australian dairy farms following application of updated methodology

Using temporal associations to determine maternal parentage in extensive beef herds

Meat Science and Product Quality

Carcass and meat quality of young Cika and Simmental bulls finished under similar conditions
Mojca Simčič, Marko Čepon and Silvester Žgur 950–957

Sex and breed affect plasma glucose, lactate, cortisol, meat quality but not muscle glycolytic potential of Dorper and Merino lambs
T. Stempa, V. Muchenje, A. M. Abrahams and G. Bradley 958–964

Influences of dietary supplementation of peanut skin powder (Arachis Hypogaea) on growth performance, carcass traits, blood chemistry, antioxidant activity and meat quality of broilers
