Genetics and Genomics
A comprehensive comparison of high-density SNP panels and an alternative ultra-high-density panel for genomic analyses in Nellore cattle

Investigation of myostatin and calpain 3 gene polymorphisms and their association with milk-production traits in Sfakia sheep

Physiology, Endocrinology and Reproduction
Efficacy of two adjuvant systems to promote humoral immunity to the pre-proghrelin peptide obestatin in pigs: consequences for the growth of piglets to weaning

Nutrition and Metabolism
The effects of dry period body condition score on some trace minerals, oxidative, and inflammatory indicators in transition dairy cows
Fatemeh Dehghan Shahreza, Hesam A. Seifi and Mehrdad Mohri  363–369

Feed Quality, Nutritional Value and Toxicology
Quantifying the ruminal degradation of nutrients in three cultivars of perennial ryegrass (Lolium perenne L.) sampled during early spring and summer

Determining the nutritive value of some commercial pulse screenings using in sacco and in vitro methods
Ghodrat Mohammadi, Mostafa Malecky and Jamal Seifdavati  379–387

Production Systems, Environment and Management
Performance of sheep systems grazing perennial pastures. 1. Pasture persistence and enterprise productivity
Susan M. Robertson, John C. Broster and Michael A. Friend  388–405

Performance of sheep systems grazing perennial pastures. 2. Wool quality and lamb growth
Susan M. Robertson and Michael A. Friend  406–413

Performance of sheep systems grazing perennial pastures. 3. Fertility, fecundity and lamb survival
Susan M. Robertson and Michael A. Friend  414–422

Performance of sheep systems grazing perennial pastures. 4. Simulated seasonal variation and long-term production
Susan M. Robertson and Michael A. Friend  423–435

The milking frequency of primiparous cows in their early stage of lactation and its impact on milking performance
Beata Sikowska, Dariusz Piwczyński, Magdalena Kolenda and Jolanta Różyńska-Zawieja  436–443

A whole-farm investment analysis of a partial mixed ration feeding system for dairy cows

Production Systems in Transition
Carcass and meat quality of crossbreds of Thai indigenous chickens and Rhode Island Red layer chickens as compared with the purebreds and with broilers
C. Kaewkot, J. Ruangsuriya, M. Kreuzer and S. Jaturasitha  454–463

Meat Science and Product Quality
Qualitative traits of the meat of Nellore steers supplemented with energy and protein in an integrated crop–livestock system
