

ANIMAL PRODUCTION SCIENCE

CONTENTS Volume 60, Issue 8, 2020, 993–1122

Perspective

Application of exogenous enzymes: is digestibility an appropriate response variable?

C. L. Walk and M. R. Bedford 993–998

Genetics and Genomics

Accuracy of genomic prediction using mixed low-density marker panels

Lianjie Hou, Wenshuai Liang, Guli Xu, Bo Huang, Xiquan Zhang, Ching Yuan Hu and Chong Wang 999–1007

Nutrition and Metabolism

Partition of dietary energy by sheep fed fresh ryegrass (*Lolium perenne*) with a wide-ranging composition and quality

C. A. Ramírez-Restrepo, G. C. Waghorn, H. Gillespie and H. Clark 1008–1017

Effect of preweaning diet on performance, blood metabolites and rumen fermentation around weaning in calves of two beef breeds

S. Yuste, Z. Amanzougarene, A. de Vega, M. Fondevila, M. Blanco and I. Casasús 1018–1027

Feed Quality, Nutritional Value and Toxicology

Use of different carbohydrate sources associated with urea and implications for *in vitro* fermentation and rumen microbial populations

K. C. Santos, F. F. R. Carvalho, M. M. Carriero, A. L. R. Magalhães, A. M. V. Batista, G. M. Fagundes and I. C. S. Bueno 1028–1038

Inclusion of a blend of copaiba, cashew nut shell and castor oil in the protein-energy supplement for grazing beef cattle improves rumen fermentation, nutrient intake and fibre digestibility

R. W. Teobaldo, N. F. De Paula, J. T. Zervoudakis, M. A. Fonseca, L. S. Cabral, H. F. Martello, J. K. L. Rocha, I. J. Ribeiro and A. T. Mundim 1039–1050

Behaviour, Well-being and Health

Modelling of breech strike risk and protective efficacy of mulesing in adult Merino sheep

B. J. Horton, R. Corkrey, J. Smith, J. Greeff and L. J. E. Karlsson 1051–1060

Production Systems, Environment and Management

Different combinations of sodium monensin and virginiamycin during feedlot finishing of Nellore cattle

A. L. N. Rigueiro, M. C. S. Pereira, M. M. Squizatti, M. M. Ferreira, S. C. Dondé, F. P. Luiz, A. M. Silvestre, L. R. Muller, C. P. Garcia, A. P. D. Bueno, L. V. Toledo, D. D. Estevam, C. L. Martins, M. D. B. Arrigoni and D. D. Millen 1061–1072

Production Systems in Transition

Milk yield at first lactation, parity, and season of calving affect the reproductive performance of water buffalo cows

Héctor Nava-Trujillo, Robert Valeris-Chacin, Armando Quintero-Moreno and Juan Escalona-Muñoz 1073–1080

The effects of zeranol and oestradiol implants on performance and nutrient digestibility of zero-grazed White Fulani cattle

O. T. Soyelu and A. O. Aderibigbe 1081–1086

Sweet potato (*Ipomoea batatas*) vine silage: a cost-effective supplement for milk production in smallholder dairy-farming systems of East Africa?

J. K. Gakige, C. Gachuri, K. Butterbach-bahl and J. P. Goopy 1087–1094

Continued on next page

Meat Science and Product Quality

Fatty acid profile, antioxidative status and dietary value of the breast muscle of broiler chickens receiving glycine-Zn chelates

Anna Winiarska-Mieczan, Małgorzata Kwiecień, Katarzyna Kwiatkowska, Ewa Baranowska-Wójcik, Dominik Sz wajgier and Ewa Zaricka 1095–1102

The effects of rapeseed cake intake during the finishing period on the fatty-acid composition of the *longissimus* muscle of Limousin steers and changes in meat colour and lipid oxidation during storage

H. Benhissi, A. García-Rodríguez and I. Beltrán de Heredia 1103–1110

Technology and Education

Broad near-infrared spectroscopy calibrations can predict the nutritional value of >100 forage species within the Australian feedbase

Hayley C. Norman, Elizabeth Hulm, Alan W. Humphries, Steve J. Hughes and Philip E. Vercoe 1111–1122
