Special Issue: Climate Predictions for Better Agricultural Risk Management

Foreword <i>M. Jarraud</i>	i
Preface: Climate Predictions for Better Agricultural Risk Management <i>Holger Meinke, M. V. K. Sivakumar, Raymond P. Motha, Rohan Nelson</i>	935
Implications of climate change on long-lead forecasting and global agriculture. <i>Raymond P. Motha</i>	939
Making climate model forecasts more useful. <i>S. B. Power, N. Plummer, P. Alford</i>	945
Constraints and opportunities in applying seasonal climate forecasts in agriculture. <i>Andrew Ash, Peter McIntosh, Brendan Cullen, Peter Carberry, Mark Stafford Smith</i>	952
Climate forecast and prediction product dissemination for agriculture in the United States. <i>Jurgen D. Garbrecht, Jeanne M. Schneider</i>	966
How do probabilistic seasonal climate forecasts compare with other innovations that Australian farmers are encouraged to adopt? <i>Peter Hayman, Jason Crean, John Mullen, Kevin Parton</i>	975
Adapting to climate change and managing climate risks by using real options. <i>Greg Hertzler</i>	985
From rainfall to farm incomes—transforming advice for Australian drought policy. I. Development and testing of a bioeconomic modelling system. <i>Philip Kokic, Rohan Nelson, Holger Meinke, Andries Potgieter, John Carter</i>	993
From rainfall to farm incomes—transforming advice for Australian drought policy. II. Forecasting farm incomes. <i>Rohan Nelson, Philip Kokic, Holger Meinke</i>	1004
