Table S1. Percentage frequency of plant species according to the eight floristic groups

Only species with a frequency great than 10% in any one group are included. Exotic species are identified with an asterisk. Wetland dependent species are also identified as well as the habitat preference

Species name	Water column dependent	Habitat preference	1	2	3	4	5	6	7	8
<i>Aeschynomene indica</i>	no	wetland shore	0(0)	0(0)	0(0)	36(0.9)	7(0.1)	35(0.8)	14(0.3)	1(0)
