

Exploration Geophysics

The Bulletin of the Australian Society of Exploration Geophysicists

EDITORIAL PANEL

Managing Editor

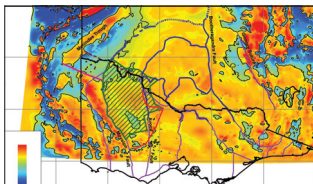

Mark Lackie

- Dip angle-compensated one-way wave equation migration 137
Weijia Sun, Binzhong Zhou and Li-Yun Fu

- A comparison of rock physics models for fluid substitution
 in carbonate rocks 146
Ali Misaghi, Sajjad Negahban, Martin Landrø and Abdolrahim Javaherian

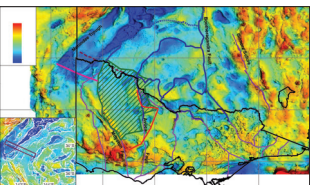

- Linking the upper crust to the upper mantle: comparison of teleseismic
 tomography with long-wavelength features of the gravity and magnetic
 fields of southeastern Australia 155
Robert Musgrave and Nicholas Rawlinson

- Removal of cultural noise from high-resolution aeromagnetic data using
 a two stage equivalent source approach 163
Ahmed Salem, Kaxia Lei, Chris Green, J. Derek Fairhead and Gerry Stanley

- Enhancing ridges in potential field data 170
Gordon R. J. Cooper

- Enhancing circular features in potential field data 174
Gordon R. J. Cooper

- Microgravimetric and ground penetrating radar geophysical methods
 to map the shallow karstic cavities network in a coastal area
 (Marina Di Capilungo, Lecce, Italy) 178
Giovanni Leucci and Lara De Giorgi
