Special Issue: 6th International Conference in Airborne Electromagnetics (AEM 2013)

Guest Editor: Aaron Davis

1–2 6th International Conference in Airborne Electromagnetics (AEM 2013)
Aaron Davis

3–11 Developing an efficient modelling and data presentation strategy for ATDEM system comparison and survey design
Magdel Combrinck

12–18 3D-spectral CDIs: a fast alternative to 3D inversion?
James Macnae

19–26 The analysis of ZTEM data across the Humble magnetic anomaly, Alaska
Daniel Sattel and Ken Whitely

27–35 Regional TEMPEST survey in north-east Namibia
Geoffrey Peters, Gregory Street, Ian Kuhniise and David Hutchies

36–48 Helicopter EM (ZTEM–VTEM) survey results over the Nugrah copper–lead–zinc–gold SEDEX massive sulphide deposit in the Western Arabian Shield, Kingdom of Saudi Arabia
Jean-M. Legault, Carlos Izarra, Alexander Prikhodko, Shengkai Zhao and Emad M. Saadawi

49–57 MULTIPULSE – high resolution and high power in one TDEM system
Tianyou Chen, Greg Hodges and Philip Miles

58–63 Geobandwidth: comparing time domain electromagnetic waveforms with a wire loop model
Greg Hodges and Tianyou Chen

64–73 Not extinct yet: innovations in frequency domain HEM triggered by sea ice studies
Andrew A. Pritchuber and Stefan Hendricks

74–84 Airborne electromagnetic modelling options and their consequences in target definition
Alain Yves Ley-Coo, Andrea Viezzoli, Julien Guillenmote, Giulio Vignoli, James Macnae, Lea Coo and Tim Munday

85–96 Modelling an arbitrarily oriented magnetic dipole over a homogeneous half-space for a rapid topographic correction of airborne EM data
Julien Guillenmote, Pascal Sailliac and Michael Behangel

97–111 New developments in AEM discrete conductor modelling and inversion
Marc A. Valken

112–117 Rapid approximate inversion of airborne TEM
Peter K. Fullagge, Glenn A. Pears, James E. Reid and Hef Schaa

118–129 Modelling the superparamagnetic response of AEM data
Daniel Sattel and Paul Mutton

130–135 Using the in-line component for fixed-wing EM 1D inversion
Adam Smiarowski

136–139 Extending the range of time constants recorded by the SPECTREM AEM system
Peter B. Leggatt
