Volume 48 Issue 9 2021

Stomata coordinate with plant hydraulics to regulate transpiration response to vapour pressure deficit in wheat <i>S. R. W. M. C. J. K. Ranawana, K. H. M. Siddique, J. A. Palta, K. Stefanova and H. Bramley</i>	839–850
Response of <i>Zebrina pendula</i> leaves to enhanced UV-B radiation <i>Dan Wang, Yuchu Sun, Mei Tu, Peipei Zhang, Xiaoqiong Wang, Taixia Wang and Jingyuan Li</i>	851–859
<i>OsLEA1a</i> overexpression enhances tolerance to diverse abiotic stresses by inhibiting cell membrane damage and enhancing ROS scavenging capacity in transgenic rice <i>Zhaodan Wang, Qian Zhang, Juan Qin, Guosheng Xiao, Shanshan Zhu and Tingzhang Hu</i>	860–870
The microbiomes on the roots of wheat (<i>Triticum aestivum</i> L.) and rice (<i>Oryza sativa</i> L.) exhibit significant differences in structure between root types and along root axes <i>Akitomo Kawasaki, Paul G. Dennis, Christian Forstner, Anil K. H. Raghavendra, Alan E. Richardson, Michelle Watt, Ulrike Mathesius, Matthew Gilliham and Peter R. Ryan</i>	871–888
Concurrent overexpression of amino acid permease <i>AAP1(3a)</i> and <i>SUT1</i> sucrose transporter in pea resulted in increased seed number and changed cytokinin and protein levels <i>Jan E. Grant, Annu Ninan, Natalia Cripps-Guazzone, Martin Shaw, Jiancheng Song, Ivan Petřík, Ondřej Novák, Mechthild Tegeder and Paula E. Jameson</i>	889–904
Seed nanoprimering by silicon oxide improves drought stress alleviation potential in wheat plants <i>Prabha Rai-Kalal, Rupal S. Tomar and Anjana Jajoo</i>	905–915
<i>MYB59</i> transcription factor behaves differently in metallicolous and non-metallicolous populations of <i>Arabidopsis halleri</i> <i>Elisa Fasani, Giovanni DalCorso and Antonella Furini</i>	916–923
The association of leaf sulfur content with the leaf economics spectrum and plant adaptive strategies <i>Michele Dalle Fratte, Simon Pierce, Magda Zanzottera and Bruno E. L. Cerabolini</i>	924–935
Transcriptional responses of <i>Hypericum perforatum</i> cells to <i>Agrobacterium tumefaciens</i> and differential gene expression in dark glands <i>Weina Hou, Rupesh K. Singh, Viviana Martins, Francisco Tenllado, Gregory Franklin and Alberto C. P. Dias</i>	936–947
Genome wide identification and expression pattern analysis of the GRAS family in quinoa <i>Xiaolin Zhu, Baoqiang Wang and Xiaohong Wei</i>	948–962
