Abstract. Water striders and their allies (Hemiptera, Gerromorpha) are familiar inhabitants of water surfaces throughout the world. One of the most species-rich groups is the subfamily Microveliinae (Veliidae) and, in particular, the genus *Microvelia* Westwood, 1834. This genus comprises small or very small bugs inhabiting the nearshore areas of stagnant or slow-flowing fresh water. Accumulation of material during the past 30 years has shown that the Australian fauna of *Microvelia* is much richer and more diverse than previously recognised. In the present paper we discuss the subgeneric classification of the genus *Microvelia* based on the results of a phylogenetic analysis using maximum parsimony, describe three new subgenera and redescribe all previously known Australian species of the genus. The new taxa are: *Microvelia* (*Austromicrovelia*), subgen. nov. (type species: *Microvelia mjobergi* Hale, 1925) with the species *Microvelia* (*Austromicrovelia*) *spurgeon*, *M. hypipamee*, *M. margaretae*, *M. monteithi*, *M. tuberculata*, *M. myorensis*, *M. woodwardi*, *M. carnarvon*, *M. annemarieae*, *M. mossman*, spp. nov. (all from Queensland), *M. eborensis* and *M. milleri*, spp. nov. (New South Wales), *M. queenslandiae*, *M. ventrospinosa*, spp. nov. (New South Wales, Queensland), *M. angelesi*, *M. alisonae*, *M. odontogaster*, spp. nov. (Northern Territory), *M. apunctata*, sp. nov. (Northern Territory, Queensland), *M. pennicilla*, sp. nov. (Northern Territory, Western Australia), *M. herberti*, *M. malipatili*, *M. torresiana*, and *M. australiensis*, spp. nov. (Northern Territory, Queensland, Western Australia), *Microvelia* (*Barbivelia*), subgen. nov. (type species: *Microvelia barbifer*, sp. nov.) with the species *Microvelia* (*Barbivelia*) *barbifer*, sp. nov. (Queensland) and *M. falcifer*, sp. nov. (Northern Territory); *Microvelia* (*Pacificovelia*), subgen. nov. (type species: *Microvelia oceanica* Distant, 1914) with the species *M. tasmaniensis*, sp. nov. (Tasmania), *M. lilliput*, and *M. kakadu*, spp. nov. (Northern Territory, Queensland, Western Australia). We further recognise the subgenus *Microvelia* (*Picaultia*), stat. nov. (type species: *Picaultia pronotalis* Distant, 1913), and describe the following new species: *Microvelia* (*Picaultia*) *justi* and *M. paramega*, spp. nov. (Northern Territory, Queensland, Western Australia), and *M. cassisi*, sp. nov. (New South Wales). Finally, *Microvelia fluvialis* weiri Malipatil, 1980, is synonymised with *Microvelia fluvialis* Malipatil, 1980. Keys to adults of all species are provided and their distributions mapped.

Material examined

Localities are arranged in a north–south sequence for each state.

Microvelia (Austromicrovelia) mjobergi Hale

Material examined

Holotype. Apterous ♂, labelled ‘Herberton, Queensland, Mjöberg’ (NRS).

Paratypes. 1♂, 2♀ apt., same locality data as holotype, 17.23S 145.23E (NRS, SAM).

Other material examined. Queensland: 1♂ apt., Mt Hypipamee Nat. Pk, debris, clear, flowing, sandy, shade, 17.26S 145.29E, 5.ii.1998, T. Weir (ANIC); 9♂, 7♀ apt., 22 nymphs, Nigger Ck, 17.27S 145.28E, flowing, clear stream, half shade, rainforest, 14.xii.1994, P. Zborowski (ANIC).

Microvelia (Austromicrovelia) spurgeon, sp. nov.

Material examined

Holotype. Apterous ♂, labelled ‘QLD, Stewart Ck, 4 km NNE Mt Spurgeon (Camp 1), 16.24S 145.13E, 1250–1380 m, 15–20.x.1991, Monteith, Janetzki, Cook & Roberts’ (QM).

Paratypes. **Queensland:** 3♂, 6♀ apt., same locality data as holotype (QM).

Microvelia (Austromicrovelia) hypipamee, sp. nov.

Material examined

Holotype. Apterous ♂, labelled 'Mt Hypipamee Nat. Pk., Qld., 17.26S 145.29E, 5.ii.1998, T. Weir' and 'amongst debris in small stream, shade, sandy bottom, clear' (ANIC).

Paratypes. **Queensland:** 1♂ apt., Wright Ck., Lake Eachan Nat. Pk., 17.17S 145.38E, pools, murky, flowing, silty, shade, 3.ii.1998, T. Weir (ANIC); 4♀ apt., same locality data as holotype (ANIC).

Microvelia (Austromicrovelia) margaretae, sp. nov.

Material examined

Holotype. Apterous ♂, labelled 'Bald Mt Area, S. Qld, Feb. 1970, T. Weir' (ANIC).

Paratypes. **New South Wales:** 2♂, 2♀ apt., Little Haystack Ck, EPA Survey – MRHI CLAR 12, 28.39S 152.30E, 9.v.1995, E. Turak (AM); 5♂, 7♀ apt., Forbes R. off Racecourse Trail, EPA Survey – MRHI HAST 18, 31.08S 152.21E, 3.x.1995, E.
