

TABLE II  
Species list of Nest Record Cards (only species with  
100 or more cards)

	to 1971	1971- 72	1972- 73	Total		to 1971	1971- 72	1972- 73	Total
Fairy Penguin	194	20	6	220	Superb Blue Wren	359	47	35	441
Crested Pigeon	194	18	32	224	White-browed Woodswallow	120	13	30	163
Spur-winged Plover	840	16	21	877	Dusky Woodswallow	169	10	16	195
Banded Plover	166	5	23	194	Silvereye	218	36	23	277
Red-capped Dotterel	194	6	5	205	Yellow-faced Honeyeater	156	34	7	197
Nankeen Kestrel	68	14	18	100	White-plumed Honeyeater	90	10	23	123
Laughing Kookaburra	87	6	7	100	New Holland Honeyeater	134	36	13	183
Superb Lyrebird	97	14	9	120	Noisy Miner	118	29	19	166
Welcome Swallow	378	56	116	550	Red Wattlebird	78	15	9	102
Grey Fantail	313	43	23	379	Pipit	87	8	18	113
Willie Wagtail	493	79	96	668	Zebra Finch	98	10	19	127
Yellow Robin	229	38	22	289	Banded Finch	98	6	10	114
Rufous Whistler	174	22	16	212	Red-browed Finch	178	57	61	296
Grey Shrike-thrush	130	24	6	160	White-winged Chough	130	29	11	170
Magpie Lark	329	28	48	405	Black-backed Magpie	190	9	12	211
Black-faced Cuckoo- shrike	120	16	15	151	White-backed Magpie	168	30	10	208
White-winged Triller	98	8	17	123	Little Raven	132	23	12	167
White-fronted Chat	131	10	24	165	Blackbird	270	41	41	352
White-throated Warbler	116	1	2	119	House Sparrow	88	3	20	111
Brown Thornbill	103	21	14	138	Goldfinch	266	29	33	328
Yellow-tailed Thornbill	322	27	22	371	Starling	186	28	39	253
Reed Warbler	101	15	10	126					

Dr H. J. Lavery requested details of clutch-size of the Large-billed Scrub Wren.

It is gratifying to know that the increasing interest in the Scheme is not only resulting in the gradual build-up of data but that individuals working on specific aspects are finding the collection valuable. It is also rewarding to all those people who work so hard recording details to know that their efforts are being used and appreciated.

Details regarding borrowing the cards are in the *RAOU Newsletter* No. 15, May 1973. In this *Newsletter* I stated, in error, that the entire collections of

Crested Pigeon and Noisy Miner cards were missing from the collection. There are, however, 'runs' of cards missing and in the *Newsletter* I will give details of reference numbers and, where possible, dates of these cards. I would be grateful if those people who have borrowed cards of either species in the past would check in case they still retain some of them.

MRS. HELEN YOUNG, 33 View Hill Crescent, Eltham,  
Vic. 3095  
10 January 1974.

## CORRIGENDUM

In my paper, 'Comments on taxonomy and relationships in the parrot subfamilies Nestorinae, Loriinae and Platycercinae', *Emu* (1973) 73: 157-176, the new name 'Psittaculirostrinae' was proposed for the fig-parrots of the genus *Psittaculirostris*. I am grateful to Dr E. Mayr for pointing out to me that Article 40 of the International Code for Zoological Nomenclature reserves family-group names even if the name of the type-genus changes; thus Cyclopsittacinae is the correct name for this subfamily and Psittaculirostrinae should be synonymized with it. Throughout the paper I used the name '*Domicella*' for the lorine genus *Lorius*; the latter name was restored by the International Commission on Zoological Nomenclature several years ago.

D. T. HOLYOAK
