Trends in the prescribing of stimulant medication for the treatment of Attention Deficit Hyperactivity Disorder in adults in NSW
Table of Contents

EXECUTIVE SUMMARY .............................................................................................................. 3

1. INTRODUCTION ............................................................................................................. 5

2. BACKGROUND ................................................................................................................. 7
   2.1 Adult ADHD and the controversy ............................................................................. 7
   2.2 Diagnosis and assessment ......................................................................................... 8
   2.3 Prevalence of ADHD among adults ........................................................................ 9
   2.4 Treatment of adult ADHD ...................................................................................... 10
      2.4.1 Stimulants ...................................................................................................... 10
      2.4.2 Antidepressants ............................................................................................. 12
      2.4.3 Other medications ......................................................................................... 12
      2.4.4 Psychosocial interventions .......................................................................... 13
      2.4.5 Alternative treatments ............................................................................... 13
   2.5 Restrictions on prescribing in NSW ..................................................................... 13
   2.6 Aim of this study ..................................................................................................... 14

3. METHODS ......................................................................................................................... 16
   3.1 Trends in the number of adults treated with stimulant medication
       for the first time ..................................................................................................... 16
   3.2 Characteristics of adults who commenced treatment for the first
       time (November to December 2002) ................................................................ 16
   3.3 Trends in the rate of adults treated with stimulant medication ................. 17
   3.4 Characteristics of adults treated with stimulant medication ................ 17
   3.5 Attrition from stimulant treatment ................................................................... 18
   3.6 Caveats ...................................................................................................................... 18

4. RESULTS ............................................................................................................................. 20
   4.1 Trends in the number of adults treated with stimulant medication
       for the first time ..................................................................................................... 20
      4.1.1 Sex ................................................................................................................. 20
      Figure 1 Number of adults with ADHD commenced on stimulant
       medication for the first time by year of commencement
       and sex, 1990 to 2002 ......................................................................................... 20
      4.1.2 Age at commencement ............................................................................... 21
      Figure 2 Average age of adults with ADHD commenced on
       stimulant medication for the first time by year of commencement,
       1990 to 2002 ....................................................................................................... 21
      Figure 3 Relative frequency distribution of age for adults with ADHD
       commenced on stimulant medication for the first time,
       1992 and 2002 .................................................................................................... 22
      4.1.3 Drug ............................................................................................................... 21
      Figure 4 Number of adults with ADHD commenced on stimulant
       medication for the first time by year of commencement
       and drug, 1990 to 2002 ..................................................................................... 22
4.2 Characteristics of adults who commenced treatment for the first time (November to December 2002)..................................................... 23

Table 1 Characteristics of adults treated with stimulant medication for ADHD for the first time, 1 November to 31 December 2002 ............................................................................ 23

4.3 Trends in the rate of adults treated with stimulant medication

4.3.1 Sex ........................................................................................................... 29

Figure 5 Rate per 10,000 NSW resident population of adults treated with stimulant medication for ADHD by year and sex, as at 30 June, 1993 to 2003 ..................................................... 29

4.3.2 Age ........................................................................................................... 30

Figure 6 Rate per 10,000 NSW resident population of adults treated with stimulant medication for ADHD by year and age, as at 30 June, 1993 to 2003 .......................................................... 30

4.3.3 Drug ........................................................................................................ 31

Figure 7 Rate per 10,000 NSW resident population of adults treated with stimulant medication for ADHD by year and drug, as at 30 June, 1993 to 2003 .......................................................... 31

4.4 Characteristics of adults treated with stimulant medication

4.4.1 Age and Sex ........................................................................................... 32

Table 2 Number and per cent of adults treated with stimulant medication for ADHD as at 30 June 2003 by age and sex.................. 32

Figure 8 Rate per 10,000 NSW resident population of adults treated with stimulant medication for ADHD as at 30 June 2003 by age and sex .......................................................... 33

4.4.2 Age and drug ........................................................................................ 34

Figure 9 Per cent of adults treated with stimulant medication for ADHD as at 30 June 2003 by age and drug ........................................ 34

4.4.3 Area health service of residence and sex..................................... 35

Figure 10 Rate per 10,000 resident population of adults treated with stimulant medication for ADHD as at 30 June 2003 by area health service and sex......................................................... 35

4.4.4 Age status at initiation of treatment............................................... 36

Figure 11 Per cent of adults treated with stimulant medication for ADHD as at 30 June 2003 who were first treated with stimulants as a child, by age and sex ................................................. 36

4.4.5 Duration of stimulant treatment .................................................... 37

Figure 12 Per cent of adults treated with stimulant medication for ADHD as at 30 June 2003 by duration of continuous treatment and age ............................................................................... 37

4.5 Attrition from stimulant treatment .................................................. 38

Figure 13 Per cent of adults treated with stimulant medication for ADHD for the first time in 1998 who discontinued after the initial treatment episode by age and sex ...................... 38

5. DISCUSSION ................................................................................................. 39
