

# PACIFIC CONSERVATION BIOLOGY

Volume 18

Number 2

## Contents

### EDITORIAL

- The value of baseline or long-term data for detecting and responding to declines in wildlife populations. *Mike Calver.* 68

### FORUM ESSAY

- Time to agree on a conservation benchmark for Australia. *Matt W. Hayward.* 69

- Now that we have our pest-proof fence, are we safe or trapped? *Heather Parks, Kyle Clifton, Lauren Best and Bridget Johnson.* 77

- Wildlife management and the debate on the ethics of animal use. II. A challenge for the animal protection movement. *Daniel Lunney.* 81

### RESEARCH PAPERS

- Conservation value of solar salt ponds in coastal tropical eastern Australia to waterbirds and migratory shorebirds. *Wayne Houston, Robert Black, Rod Elder, Leif Black and Richard Segal.* 100

- Long-term response of the mamane forest to feral herbivore management on Mauna Kea, Hawaii. *E. Reddy, D. H. Van Vuren, P. G. Scowcroft, J. B. Kauffman and L. Perry.* 123

- Dry rainforests have a distinct and more diverse assemblage of epigaeic invertebrates than eucalypt woodlands: implications for ecosystem health monitoring. *Wayne A. Houston and Alistair Melzer.* 133

### BOOK REVIEWS

- Burning Issues – Sustainability and Management of Australia's Southern Forests. *Adam J. Leavesley.* 146

- A Field Guide to Freshwater Fishes, Crayfish and Mussels of South-Western Australia. *Tim Blake.* 148

Papers submitted to *Pacific Conservation Biology* are individually and fully peer reviewed by a minimum of two referees. Referees are independent of the editorial board and are chosen for their expertise in the subject area of the paper submitted. In addition, papers are vigorously reviewed and edited by the editorial board. Nonetheless, the views put by authors are their own and do not necessarily reflect those of the editors or the Publisher.

### COPYRIGHT

Submission of a paper to *Pacific Conservation Biology* will be taken to imply that it presents original unpublished work, not under consideration for publication elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature, and translations. Permission to publish illustrations must be obtained by the author before submission and any acknowledgements should be included in the captions.

Authors of papers in *Pacific Conservation Biology* should be subscribers to the journal. The Editor-in-Chief will ask whether any of the authors is a subscriber when confirming acceptance of a paper. If one or more authors is a subscriber, there will be no charge for publication, unless the authors have agreed to pay the charges for colour or accelerated publication (see below). If no author subscribes, the corresponding author will be invoiced a flat publication fee of Aud\$100, plus and charges for colour or accelerated publication (see below). Whether or not one or more authors subscribes has no bearing on the acceptance of a paper. Authors may choose to include colour figures in their papers at a cost of Aud\$150 per page with a colour component. Authors may also accelerate publication to the next available issue without penalty to other authors by paying full page charges of AUD\$65 per page.

For your convenience subscription forms are enclosed. If you already subscribe, assist the conservation of biodiversity in the Pacific region by encouraging a colleague and/or library to subscribe.

ON FRONT COVER: Still conditions show the salt ponds, vegetated banks and stags; all key elements that provide foraging, shelter and roosting habitat for migratory shorebirds, waterbirds and endangered species such as the Capricorn Yellow Chat. Photo by: *Wayne Houston.*
