

PACIFIC CONSERVATION BIOLOGY

Volume 23 • Issue 4 • 2017

CONTENTS

EDITORIAL

Suicide by population

H. F. Recher

313

PERSPECTIVE

Field guides, bird names, and conservation

H. F. Recher

315

REVIEWS

The sharks and rays of the Solomon Islands: a synthesis of their biological diversity, values and conservation status

S. Hylton, W. T. White and A. Chin

324

Utilising aversive conditioning to manage the behaviour of K'gari (Fraser Island) dingoes (*Canis dingo*)

R. Appleby, B. Smith, L. Bernede and D. Jones

335

RESEARCH PAPERS

Changes in woodland bird communities as replanted woodland matures

S. J. S. Debus, W. K. Martin and J. M. Lemon

359

Variation in bird assemblages and their invertebrate prey in eucalypt formations across a rainfall gradient in south-west Australia

J. D. Majer, H. F. Recher, C. Norwood and B. E. Heterick

372

Factors affecting frog species richness in the Solomon Islands

P. Pikacha, C. Morrison, C. Filardi and L. Leung

387

Implications of floristic patterns, and changes in stand structure following a large-scale, intense fire across forested ecosystems in south-western Australia's high-rainfall zone

G. Wardell-Johnson, S. Luxton, K. Craig, V. Brown, N. Evans and S. Kennedy
