

PACIFIC CONSERVATION BIOLOGY

Volume 7

Number 2

ISSN 1038-2097

Contents

EDITORIAL

- Veterinary Conservation Biology. *H. F. Recher.* 77

RESEARCH PAPER

- Community survey of the distribution of Lumholtz's Tree-kangaroo on the Atherton Tablelands, north-east Queensland. *J. Kanowski, L. Felderhof, G. Newell, T. Parker, C. Schmidt, B. Stirn, R. Wilson and J. W. Winter.* 79
- Testing for food limitation in reintroduced Hihi populations: Contrasting results for two islands. *D. P. Armstrong and J. G. Ewen.* 87
- Case history studies of the effects of vegetation succession and fire on the moth *Fraus simulans* (Lepidoptera, Hepialidae) and its food plant, the sedge *Ecdeiocolea monostachya* (Ecdeiocoleaceae) in the Western Australian Wheatbelt: implications for retention of biodiversity. *A. R. Main.* 93
- Biodiversity of canopy arthropods in Jarrah forest of south-west Western Australia: review of ecological theory and conservation management. *I. Abbott and A. Wills.* 101
- Prostanthera junonis* Conn (LAMIACEAE); is recovery possible? *D. A. Tierney and C. L. Gross.* 118
- Ecological attributes and conservation of dasyurid marsupials in New South Wales, Australia. *C. R. Dickman, D. Lunney and A. Matthews.* 124
- Abundance and management of Mariana Fruit Bats and feral ungulates on Anatahan, Mariana Islands. *D. J. Worthington, A. P. Marshall, G. J. Wiles and C. C. Kessler.* 134

RESEARCH NOTE

- Field evaluation of a visual barrier to discourage gull nesting. *P. A. Pochop, J. L. Cummings and R. M. Engeman.* 143

BOOK REVIEWS

- Preserving Wildlife: An International Perspective. *N. E. Tapp.* 146
- The Directory of Australian Birds: Passerines. *H. Recher.* 146
- Threatened Birds of the World. *H. Recher.* 149

Papers submitted to *Pacific Conservation Biology* are individually and fully peer reviewed by a minimum of two referees. Referees are independent of the editorial board and are chosen for their expertise in the subject area of the paper submitted. In addition, papers are vigorously reviewed and edited by the editorial board. Nonetheless, the views put by authors are their own and do not necessarily reflect those of the editors or the Publisher.

COPYRIGHT

Submission of a paper to *Pacific Conservation Biology* will be taken to imply that it presents original unpublished work, not under consideration for publication elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature, and translations.

Permission to publish illustrations must be obtained by the author before submission and any acknowledgements should be included in the captions.

Authors of papers in *Pacific Conservation Biology* should be subscribers to the journal. Please indicate whether one or more of the authors is a subscriber. Not subscribing will not affect the publication of the paper. However, whereas subscribers receive 25 free reprints and do not pay page charges, non-subscribers do not receive free reprints and will be asked to pay a nominal AUD\$20 per printed page. These charges will be invoiced when page proofs are sent to authors. If they do not receive grant or institutional support for publication, contributors may request an exemption from page charges. This is similar to procedures followed by other journals, including the Australian Ecological Society and the Royal Society of Western Australia in the publication of their journals. Authors may accelerate publication of their papers to the next available issue without penalty to other authors by paying full page charges of AUD\$65 per page. This still represents a significant publication subsidy.

For your convenience subscription forms have been enclosed. The increased cost is largely the result of the introduction of a government sales tax on knowledge in Australia. If you already subscribe, assist the conservation of biodiversity in the Pacific Region by encouraging a colleague and/or library to subscribe.
