

CORRIGENDA

VOLUME 17, NUMBER 3, PAGES 389-403

*"Average radiation-pressure forces produced by sound fields"*Page 397, *Equations (56) should read:*

$$\left. \begin{aligned} \mathbf{u}'_r &= -\nabla\phi_r^*, \\ p'_r &= -i\omega\rho_0\phi_r^*, \end{aligned} \right\} \quad (56)$$

Page 397, *After equation (57) insert:*

Further suppose each of the ϕ_r to be of constant phase over S , in which case it is permissible to remove the complex conjugates of equations (56) when describing the fields on S .
