## Australian Journal of Physics

A journal for the publication of results of original scientific research in pure and applied physics

This journal is one of the Australian Journals of Scientific Research published by the Commonwealth Scientific and Industrial Research Organization with the co-operation of the Australian Academy of Science. Editorial policy for the journal series is developed by a Board appointed jointly by CSIRO and the Australian Academy of Science.

### Advisory Committee

Acceptance of papers for this journal is in the hands of an Advisory Committee appointed after consultation with the Board and the Australian Institute of Physics. All papers are refereed externally. Committee members advise editors on the selection of referees and adjudicate in the case of conflicting or adverse reports.

*Chairman* T. F. Smith, Monash University

*Members* J. L. Caswell, Division of Radiophysics, CSIRO  
L. T. Chadderton, Division of Chemical Physics, CSIRO  
J. Graham, Division of Mineral Physics, CSIRO  
C. A. Hurst, University of Adelaide  
B. H. J. McKellar, University of Melbourne  
D. B. Melrose, University of Sydney (AIP)  
R. H. Spear, Australian National University  
B. J. Walby, (*Editor-in-Chief*)

### *Corresponding*

*Members* R. H. Dalitz, University of Oxford  
M. A. Morrison, University of Oklahoma

### Editors

R. P. Robertson  
B. J. Schmetzer

Issued six times a year

Annual subscription

\$A125 (surface)  
\$A137 (airmail)  
\$A40 (microfiche)

ISSN 0004-9506

The Notice to Authors is published in the first issue of each volume. Copies are available on request.

All inquiries and manuscripts should be forwarded to:

The Editor-in-Chief  
Australian Journal of Physics  
314 Albert Street  
East Melbourne, Victoria 3002

© CSIRO Australia 1985. Printed by CSIRO, Melbourne.

Permission to photocopy items from this journal is granted by CSIRO to libraries and other users registered with the Copyright Clearance Center (CCC), provided that the stated fee for each copy is paid directly to the CCC, 27 Congress Street, Salem, MA 01970, U.S.A. Special requests should be addressed to the Editor-in-Chief, CSIRO, 314 Albert Street, East Melbourne, Victoria 3002.

## Editorial

### General Physics

Universal features of tangent bifurcation. *R. Delbourgo and B. G. Kenny*    1

### Elementary Particles and Fields

Bound on the number of flavours. *G. A. Christos*    23

### Nuclear Physics

States in  $^{40}\text{Ca}$  near 12 MeV excitation from the  $^{39}\text{K}(p, \gamma)^{40}\text{Ca}$  reaction.  
*M. E. Sevier, G. M. Crawley and D. G. Sargood*    27

Variational approach to the calculation of the binding energy of  $^{31}_{\Lambda\Lambda}\text{Si}$ .  
*M. H. Ahsan and S. Ali*    33

### Fluids, Plasmas and Electric Discharges

The dynamics of steady hexagonal magnetoconvection. *J. O. Murphy and J. M. Lopez*    41

### Condensed Matter: Structure etc.

The room temperature elastic behaviour of  $\text{CsH}_2\text{PO}_4$ . *S. Prawer, T. F. Smith and T. R. Finlayson*    63

Neutron diffraction studies of  $\text{CsSCN}$  above room temperature. *M. A. Irving, M. M. Elcombe and T. F. Smith*    85

### Geophysics, Astronomy and Astrophysics

Poloidal flow in axisymmetric pulsar magnetospheres. *R. R. Burman*    97

**Volume 37, Number 6, was published on 14 February 1985**

# Australian Journal of Physics

**Contents**      Volume 38   Number 2   1985

## General Physics

Variational theory of reflection. *John Lekner*    113

## Atomic and Molecular Physics

Quantum-statistical analysis of low energy sputtering. *H. E. Wilhelm*    125

Solar photodetachment rates of monatomic anions. *E. M. Helmy and S. B. Woo*    135

## Fluids, Plasmas and Electric Discharges

Higher frequency spectrum of a diffuse linear pinch with multiple ion species.  
*W. N.-C. Sy*    143

The existence of non-unique steady state solutions to the RMF current drive equations. *W. N. Hugrass*    157

## Condensed Matter: Structure etc.

Dynamics of a nonlinear diatomic chain. II Thermodynamic properties.  
*B. I. Henry and J. Oitmaa*    171

Dynamics of a nonlinear diatomic chain. III A molecular dynamics study.  
*B. I. Henry and J. Oitmaa*    191

Molecular dynamics simulations of liquids. *Jeffery L. Tallon and  
Rodney M. J. Cotterill*    209

Two-dimensional Ising model on a 4-6-12 lattice. *K. Y. Lin and W. N. Huang*    227

## Cross-disciplinary Physics

A modified solar collector flow factor. *M. J. O'Keefe and J. L. A. Francey*    233

## Geophysics, Astronomy and Astrophysics

Bianchi type I cosmological models with perfect fluid and magnetic field.  
*S. R. Roy, S. Narain and J. P. Singh*    239

**Volume 38, Number 1, was published on 4 May 1985**

# Australian Journal of Physics

**Contents**      Volume 38      Number 3      1985

*A collection of papers by friends and colleagues of Dr A. McL. Mathieson, prepared on the occasion of his 65th birthday.*

*Guest Editors: S. L. Mair and S. W. Wilkins*

On the contribution of A. McL. Mathieson to crystallography. *Sylvia L. Mair and Stephen W. Wilkins*    249

A brief history of Fourier methods in crystal-structure determination. *C. A. Beevers and H. Lipson*    263

Atomic charges and electron density partitioning. *E. N. Maslen and M. A. Spackman*    273

Atomic contribution to crystalline property temperature dependence. *S. C. Abrahams*    289

Some helical structures generated by reflexions. *A. C. Hurley*    299

The two-state problem in diffraction, NMR and laser atomic spectroscopy. *A. F. Moodie, S. W. Wilkins, T. J. Bastow and P. Hannaford*    311

Deconvolution in the presence of noise using the maximum entropy principle. *S. Steenstrup*    319

Dead time correction for a position sensitive detector. *T. C. Brown and J. K. Mackenzie*    329

A neutron spectrometer with a two-dimensional detector for time-resolved studies. *B. P. Schoenborn, A. M. Saxena, M. Stamm, G. Dimmler and V. Radeka*    337

X-ray collimation for protein crystallography. *U. W. Arndt and D. J. Thomas*    353

Solid state track detectors: Applications to fission related studies. *Sohan L. Koul*    359

Theoretical and experimental techniques for the determination of X-ray anomalous dispersion corrections. *Dudley Creagh*    371

Detection of radiation damage in organic crystals. *Paul Seiler and Jack D. Dunitz*    405

[continued overleaf]

AUJPAS 38(3) 249-538 (1985)

- Crystal structure of triclinic colchicine hemihydrate. *Maureen F. Mackay, James D. Morrison and Jacqueline M. Gulbis* 413
- Symmetry of terms in the temperature factor for Bragg diffraction of X rays or neutrons. *S. L. Mair* 421
- Wavelength dependence of moderate extinction effects in an extended-face crystal of cadmium selenide. *Andrew W. Stevenson and Zwi Barnea* 427
- Electron microscope images of icosahedral and cuboctahedral (f.c.c. packing) clusters of atoms. *J. C. Barry, L. A. Bursill and J. V. Sanders* 437
- Burgers vectors in secondary grain boundary dislocation structures for near  $\Sigma 9$ ,  $\Sigma 27$  and  $\Sigma 81$  boundaries. *C. T. Forwood and L. M. Clarebrough* 449
- The anatomy of an image. *A. F. Moodie and H. J. Whitfield* 471
- A comparison between electron crystal scattering potentials derived from X ray electron densities and from atom muffin tin potentials. *Andrew E. Smith and D. F. Lynch* 487
- Solving crystal structures from powder diffraction data. *A. Norlund Christensen, M. S. Lehmann and M. Nielsen* 497
- Extinction in polycrystalline materials. *T. M. Sabine* 507
- Technique and performance of powder diffraction in crystal structure studies. *J. C. Taylor* 519

**Contents**      Volume 38   Number 4   1985

## General Physics

Scattering at the positive energy bound states. *D. Husain, S. Suhrabuddin and A. M. Awin*    539

The large number hypothesis and Einstein's theory of gravitation.  
*Yun-Kau Lau*    547

## Nuclear Physics

Determination of  $B(E3; 0_1^+ \rightarrow 3_1^-)$  values for the stable isotopes of cadmium.  
*M. P. Fewell, R. H. Spear, G. K. Adam and M. T. Esat*    555

States of  $^5\text{He}$  and  $^5\text{Li}$ . *F. C. Barker and C. L. Woods*    563

## Atomic and Molecular Physics

The reaction rate coefficient for the clustering of He to  $\text{Li}^+$  at low centre of mass energies. *R. A. Cassidy and M. T. Elford*    577

The mobility of  $\text{Li}^+$  ions in helium and argon. *R. A. Cassidy and M. T. Elford*    587

Evaluation of core correlation effects in the  $4s4p^1P^0$  state of calcium.  
*R. Glass*    603

Coherent X-ray scattering by  $\text{CoIII}$ . *R. Glass*    609

## Condensed Matter: Structure, Mechanical and Thermal Properties

Thermal properties of stabilized zirconia at low temperatures. *J. G. Collins, S. J. Collocott and G. K. White*    617

## Condensed Matter: Electronic Structure etc.

The effect of the angular dependence of sputtering in fusion reactors. *J. L. Cook and E. K. Rose*    623

## Cross-disciplinary Physics

Self-draining manifolds for solar collectors. *R. C. McPhedran, I. C. Onley, D. R. McKenzie and R. E. Collins*    633

## Geophysics, Astronomy and Astrophysics

A comparison of methods for calculating  $\text{O}(^1\text{S})$  lifetimes. *G. B. Burns and J. S. Reid*    647

Volume 38, Number 3, was published on 30 July 1985

# Australian Journal of Physics

---

**Contents**      Volume 38   Number 5   1985

## Nuclear Physics

Calculation of the  $^{13}\text{N}(p,\gamma)^{14}\text{O}$  cross section at low energies. *F. C. Barker*    657

Electron capture decay energies of  $^{153}\text{Gd}$  and  $^{175}\text{Hf}$ .

*Ralph-D. von Dincklage*    671

## Atomic and Molecular Physics

Low energy electron collision cross sections for methane. *G. N. Haddad*    677

## Fluids, Plasmas and Electric Discharges

Reflection of magnetoionic waves from a steep density gradient. I. Incident extraordinary mode. *L. M. Hayes*    687

Reflection of magnetoionic waves from a steep density gradient. II. Incident ordinary mode. *L. M. Hayes*    705

X-ray propagation in strongly magnetized plasmas. *J. G. Kirk and N. F. Cramer*    715

## Condensed Matter: Structure, Mechanical and Thermal Properties

Computer simulation studies of the phase transition in compressible deuteroammonium chloride. *Sadhana Pandey and S. K. Trikha*    733

## Condensed Matter: Electronic Structure etc.

The formation energy of point defects in ionic crystals. *W. A. Runciman, B. Srinivasan and D. D. Richardson*    741

## Geophysics, Astronomy and Astrophysics

Electron outflow in axisymmetric pulsar magnetospheres. *R. R. Burman*    749

A Bianchi type V universe with stiff fluid and electromagnetic radiation. *S. R. Roy and J. P. Singh*    763

Volume 38, Number 4, was published on 9 October 1985

# Australian Journal of Physics

*Papers presented at the R. G. Giovanelli Commemorative Colloquium*  
*Part I, Sydney, N.S.W., 26–29 November 1984;*  
*Part II, Tucson, Arizona, 17–18 January 1985.*

Guest Comment. *C. J. Durrant*

Contributions by R. G. Giovanelli to solar instrumentation.  
*Jacques M. Beckers*    769

Contributions by R. G. Giovanelli to the study of magnetic field structures.  
*W. Livingston*    775

New materials applications in solar spectral analysis. *David M. Rust*    781

Future techniques and instrumentation in solar–stellar physics.  
*Jacques M. Beckers*    791

Vistas on stellar–solar atmospheres. *J.-C. Pecker*    799

Oscillations in sunspots. *John H. Thomas*    811

Magnetohydrodynamic tube waves: Waves in fibrils. *P. S. Cally*    825

Global oscillations and active regions. *C. J. Durrant*    839

The influence of magnetic fields on convective motions in the outer layers of the Sun. *R. Van der Borcht and P. Fox*    845

The cancellation of magnetic flux. I. On the quiet Sun. *S. H. B. Livi, J. Wang and S. F. Martin*    855

The relationship between coronal bright points as seen in He I  $\lambda 10830$  and the evolution of the photospheric network magnetic fields. *Karen L. Harvey*    875

Dynamic time dependent hexagonal magnetoconvection. *J. M. Lopez and J. O. Murphy*    885

The possibility of a photospheric dynamo. *P. R. Wilson*    911

Recent studies of magnetic canopies. *Harrison P. Jones*    919

The cancellation of magnetic flux. II. In a decaying active region. *S. F. Martin, S. H. B. Livi and J. Wang*    929

Evolution of weak solar magnetic fields. <i>Harold Zirin</i>	961
Evidence for a common magnetic driver for flares and quiescent coronae/chromospheres. <i>A. Skumanich</i>	971
The eigenvalue approach in modelling solar magnetic structures. <i>Vladimir A. Osherovich</i>	975
Magnetic reconnection in the Earth's magnetotail. <i>Edward W. Hones, Jr</i>	981
Numerical simulations of large-scale solar magnetic fields. <i>C. R. DeVore, N. R. Sheeley, Jr, J. P. Boris, T. R. Young, Jr and K. L. Harvey</i>	999
Sunspot number series envelope and phase. <i>R. N. Bracewell</i>	1009
Solar affinity of sedimentary cycles in the late Precambrian Elatina Formation. <i>G. E. Williams</i>	1027
The sunspot cycle and solar magnetic fields. I. The mechanism as inferred from observation. <i>Ronald G. Giovanelli</i>	1045
The sunspot cycle and solar magnetic fields. II. The interaction of flux tubes with the convection zone. <i>Ronald G. Giovanelli</i>	1067
