Australian Journal of Physics

A journal for the publication of results of original scientific research in pure and applied physics

This journal is one of the Australian Journals of Scientific Research published by the Commonwealth Scientific and Industrial Research Organization with the co-operation of the Australian Academy of Science. Editorial policy for the journal series is developed by a Board appointed jointly by CSIRO and the Australian Academy of Science.

Advisory Committee

Acceptance of papers for this journal is in the hands of an Advisory Committee appointed after consultation with the Board and the Australian Institute of Physics. All papers are refereed externally. Committee members advise editors on the selection of referees and adjudicate in the case of conflicting or adverse reports.

Chairman T. F. Smith, Monash University

Members J. L. Caswell, Division of Radiophysics, CSIRO
L. T. Chadderton, Division of Chemical Physics, CSIRO
S. M. Hamberger, Australian National University
B. H. J. McKellar, University of Melbourne
D. B. Melrose, University of Sydney (AIP)
J. Oitmaa, University of New South Wales
R. H. Spear, Australian National University
B. J. Walby, Editor-in-Chief, CSIRO

Corresponding

Members R. H. Dalitz, University of Oxford
M. A. Morrison, University of Oklahoma

Editors

R. P. Robertson
B. J. Schmetzer

Issued six times a year

Annual subscription

\$A135 (surface)
\$A155 (airmail)
\$A50 (microfiche)
\$A40 (concession)

ISSN 0004-9506

The Notice to Authors is published in the first issue of each volume. Copies are available on request.

All inquiries and manuscripts should be forwarded to:

The Editor-in-Chief
Australian Journal of Physics
314 Albert Street
East Melbourne, Victoria 3002

Permission to photocopy items from this journal is granted by CSIRO to libraries and other users registered with the Copyright Clearance Center (CCC), provided that the stated fee for each copy is paid directly to the CCC, 27 Congress Street, Salem, MA 01970, U.S.A. Special requests should be addressed to the Editor-in-Chief, CSIRO, 314 Albert Street, East Melbourne, Victoria 3002.

Australian Journal of Physics

Contents Volume 39 Number 1 1986

Editorial

Nuclear Physics

Superaligned Fermi β decays, CVC and Universality. *W. Jaus and G. Rasche* 1

Atomic and Molecular Physics

Excitation of swift heavy ions in foil targets. II. X-radiation from Br.
H. J. Hay, L. F. Pender and P. B. Treacy 15

The mobility of K^+ ions in helium and argon. *R. A. Cassidy and
M. T. Elford* 25

Fluids, Plasmas and Electric Discharges

The LT-4 tokamak. II. MHD Activity. *A. D. Cheetham, S. M. Hamberger,
J. A. How, H. Kuwahara, A. H. Morton and L. E. Sharp* 35

Dielectric tensor of weakly relativistic electron distributions separable in
momentum and pitch angle. *P. A. Robinson* 57

Condensed Matter: Structure, Mechanical and Thermal Properties

Experimental determination of the imaging properties of a 200 kV electron
microscope. *S. R. Glanvill, A. F. Moodie, H. J. Whitfield and I. J. Wilson* 71

Geophysics, Astronomy and Astrophysics

Fast timing of air shower fronts. *R. W. Clay and D. Ciampa* 93

Finite element calculations for non-radial oscillations of stars. *R. A. S. Fiedler
and A. L. Andrew* 99

Flux densities, spectra and variability of pulsars at metre wavelengths. *O. B. Slee,
S. K. Alurkar and A. D. Bobra* 103

Corrigendum to: Numerical simulations of large-scale solar magnetic fields.
*C. R. DeVore, N. R. Sheeley, Jr, J. P. Boris, T. R. Young, Jr and
K. L. Harvey* 115

Volume 38, Number 6, was published on 4 February 1986

Australian Journal of Physics

Contents Volume 39 Number 2 1986

Review

Experimental aspects of the electroweak gauge theory. *Allan G. Clark and Stuart N. Tovey* 117

General Physics

Dependence of the universal constants on the nature of the maximum of the mapping function. *R. Delbourgo, W. Hart and B. G. Kenny* 189

Nuclear Physics

An analytic distorted wave approximation for electropion and photopion production on ^{12}C near threshold. *F. Di Marzio and K. Amos* 203

Enhancement of parity violation for overlapping nuclear resonances. *A. M. Awin* 217

Atomic and Molecular Physics

The dependence of measured drift velocity on shutter open time in the four gauze time-of-flight method. *O. M. Williams and M. T. Elford* 225

The application of Blanc's law to the determination of the diffusion coefficients for thermal electrons in gases. *Zoran Lj. Petrović* 237

The determination of the diffusion coefficient for thermal electrons in water vapour by the use of a modified Blanc's law procedure. *Zoran Lj. Petrović* 249

Fluids, Plasmas and Electric Discharges

EXAFS spectroscopy by continuum soft X-ray emission from a short pulse laser-produced plasma. *G. J. Tallents, B. Luther-Davies and M. A. Horsburgh* 253

Ionization growth between hyperboloidal needle and plane electrode under r.f. electric fields in N_2 . I. Image intensifier observations and the influence of space charge accumulations. *N. Sato and S. C. Haydon* 271

Ionization growth between hyperboloidal needle and plane electrode under r.f. electric fields in N_2 . II. Spectroscopic investigations. *N. Sato and S. C. Haydon* 293

Condensed Matter: Structure, Etc.

A calculation of the room temperature elastic constants of caesium thiocyanate.
G. Hua and F. Ninio 309

Corrigendum to: A neutron spectrometer with a two-dimensional detector for time-resolved studies. *B. P. Schoenborn, A. M. Saxena, M. Stamm, G. Dimmler and V. Radeka* 329

Volume 39, Number 1, was published on 8 April 1986

Australian Journal of Physics

Contents Volume 39 Number 3 1986

General Physics

Is there a connection between local and global (in-)stability? *B. Eckhardt, J. A. Louw and W.-H. Steeb* 331

The large numbers hypothesis and a relativistic theory of gravitation.
Y. K. Lau and S. J. Prokhovnik 339

Elementary Particles and Fields

Alternative scheme of spontaneous chiral symmetry breaking.
G. A. Christos 347

Nuclear Physics

Excitation function for $^{16}\text{O} + ^{24}\text{Mg}$ elastic scattering at $\theta_{\text{c.m.}} = 90^\circ$. *P. V. Drumm, D. F. Hebbard, T. R. Ophel, J. Nurzynski, Y. Kondō, B. A. Robson and R. Smith* 369

Cross-disciplinary Physics and Related Areas of Science and Technology

Experimental study of noise temperature and conversion loss of SIS junction mixers. *J. C. Macfarlane, L. B. Whitbourn and R. A. Batchelor* 379

Geophysics, Astronomy and Astrophysics

Interpretation of backscattered HF radio waves from the sea. *G. R. S. Naylor and R. E. Robson* 395

Low temperate zone sporadic-E: seasonal and diurnal variations at Rarotonga.
W. J. Baggaley 401

Finite Larmor radius modifications to the magnetoionic wave modes and their effects on electron cyclotron maser emission. *L. T. Ball and R. G. Hewitt* 407

Relativistic electron injection into axisymmetric pulsar magnetospheres.
R. R. Burman 421

Scattering of pulsar radiation and electron density turbulence in the interstellar medium. *S. K. Alurkar, O. B. Slee and A. D. Bobra* 433

Volume 39, Number 2, was published on 9 May 1986

Australian Journal of Physics

Contents Volume 39 Number 4 1986

Elementary Particles and Fields

Parity violation from SUSY vertex corrections in deep inelastic scattering.
Lloyd C. L. Hollenberg and Bruce H. J. McKellar 449

Nuclear Physics

A phenomenological nucleon–nucleon interaction. *L. Berge and L. Petris* 461

The discrepancy in the Fermi matrix elements of the isospin-forbidden $4^+ \rightarrow 4^+ \beta^-$ decay of ^{46}Sc . *E. L. Saw and C. T. Yap* 473

Atomic and Molecular Physics

Excited-state quenching phenomena in weakly ionised nitrogen. *A. Ernest, S. C. Haydon and M. T. Elford* 479

Numerical simulation of positron diffusion in the heavy noble gases Ar, Kr and Xe.
Vikram Singh and P. S. Grover 497

Classical Areas of Phenomenology

Intensity correlation functions for 'thermalised' TEM_{n0} laser beams.
R. Hoare, R. Mardling and G. J. Troup 505

Fluids, Plasmas and Electric Discharges

The influence of the spatial harmonics on the rotating magnetic field current drive.
W. N. Hugrass 513

Condensed Matter: Electronic Structure, Etc.

Conduction electron scattering in alloys. *P. L. Rossiter* 529

Phonon spectrum of ternary alloys. *P. Nayak* 547

Electronic structure of the principal uranium centre in alkali fluorides.
W. A. Runciman, B. Srinivasan and S. Saebo 555

Volume 39, Number 3, was published on 17 June 1986

Australian Journal of Physics

Contents Volume 39 Number 5 1986

Papers presented at the Specialist Workshop on Excited and Ionised States of Atoms and Molecules, Strathgordon, Tasmania, 3–7 February 1986. Sponsored under the U.S.A.–Australia Bilateral Science and Technology Agreement.

Guest Comment. *F. P. Larkins*

Satellite intensities in photoelectron spectroscopy and electron momentum spectroscopy–synchrotron radiation studies of argon 3s and xenon 5s photoionisation ($h\nu = 60\text{--}130\text{ eV}$). *C. E. Brion and K. H. Tan* 565

Electron momentum spectroscopy. *I. E. McCarthy* 587

Current status and future directions of atomic studies by electron spectrometry with synchrotron radiation. *M. O. Krause* 601

Polarisation and angular correlations of excited P states of helium and hydrogen. *J. F. Williams* 621

Auger electron–ion coincidence studies to determine the pathways in soft X-ray induced fragmentation of isolated molecules. *W. Eberhardt, E. W. Plummer, In Whan Lyo, R. Reininger, R. Carr, W. K. Ford and D. Sondericker* 633

Current developments in the relativistic quantum mechanics of atoms and molecules. *I. P. Grant* 649

Inclusion of relativistic effects in electronic structure calculations. *K. G. Dyall* 667

Relativistic effects in the photoionisation of heavy atoms: Cooper minima. *Pranawa C. Deshmukh, B. R. Tambe and Steven T. Manson* 679

Recent progress in a Green's function method for the calculation of ionisation spectra. *W. von Niessen, P. Tomasello, J. Schirmer and L. S. Cederbaum* 687

Full CI extrapolation: application to H_2O with a double zeta basis set. *P. D. Gray and P. G. Burton* 711

X-ray emission spectra of some carbon-containing molecules. *R. A. Phillips and F. P. Larkins* 717

The analysis and understanding of ionisation phenomena: *ab initio* molecular wavefunctions. *Paul S. Bagus, Constance J. Nelin and Klaus Hermann* 731

[Continued overleaf]

AUJPAS 39(5) 565–869 (1986)

- A numerical variational method for calculating accurate vibrational energy separations of small molecules and their ions. *G. Doherty, M. J. Hamilton, P. G. Burton and E. I. von Nagy-Felsobuki* 749
- Dynamics of single- and multi-photon ionisation processes in molecules. *V. McKoy, S. N. Dixit, R. L. Dubs and D. L. Lynch* 761
- Photoionisation cross sections of chlorine atoms and molecules at 584 Å. *W. J. van der Meer, R. J. Butselaar and C. A. de Lange* 779
- Photoelectron spectroscopy using pulsed free jets. *Frank Carnovale, J. Barrie Peel and Richard G. Rothwell* 789
- Photoionisation of unusual states of matter: atomic ions, excited states and open-shell atoms. *Steven T. Manson and Samir K. Bhattacharya* 799
- Photoionisation and Auger electron emission from the lithium molecule: calculations using multicentre numerical continuum functions. *F. P. Larkins and J. A. Richards* 809
- Some recent developments in atomic lifetime determinations. *P. Hannaford and R. M. Lowe* 829
- Multivacancy effects in atomic and molecular spectra. *Richard D. Deslattes* 845
- Deexcitation electron spectroscopy: a probe for the localisation of valence wavefunctions in free and adsorbed molecules. *W. Eberhardt, E. W. Plummer, C. T. Chen and W. K. Ford* 853

Australian Journal of Physics

Contents Volume 39 Number 6 1986

Nuclear Physics

Particle-hole description of dipole states in ^{17}O . *J. A. Eden and Y. I. Assafiri* 871

Classical Areas of Phenomenology

Kirkwood theory of shear viscosity in a simple dense fluid. *A. F. Collings and Denis J. Evans* 881

Fluids, Plasmas and Electric Discharges

Four-wave processes involving two low frequency waves. *D. B. Melrose* 891

Condensed Matter: Electronic Structure, Etc.

Investigation of the interaction of electrons and lattice vibrations using glassy metal thermopower. *A. B. Kaiser, A. L. Christie and B. L. Gallagher* 909

Cross-disciplinary Physics

Heat transport in liquid filled tubes. *R. Schmid, B. A. Pailthorpe and R. E. Collins* 919

The effect of the flow distribution on the thermal efficiency of a solar collector. *M. J. O'Keefe and J. L. A. Francey* 945

Geophysics, Astronomy and Astrophysics

Comptonisation of radiation below the cyclotron frequency in a strong magnetic field. *D. B. Melrose and W. E. P. Padden* 961
