
Australian Journal of Physics

Volume 43

Melbourne 1990

Australian Journal of Physics

This journal is one of the twelve Australian Journals of Scientific Research published by the Commonwealth Scientific and Industrial Research Organisation with the cooperation of the Australian Academy of Science. Editorial policy for the AJSR series is developed by a Board appointed jointly by CSIRO and the Academy of Science.

Editorial Board

Acceptance of papers for this journal is supervised by an Editorial Board appointed by CSIRO and the Academy of Science after consultation with the Australian Institute of Physics. All papers are refereed. The journal assumes that all the authors of a multi-authored paper agree to its submission. Editorial Board members advise the managing editor on the selection of referees and adjudicate in the case of conflicting or adverse reports.

<i>Chair</i>	D. B. Melrose	University of Sydney (AIP)
<i>Members</i>	J. G. Collins	CSIRO Applied Physics
	R. H. Dalitz	University of Oxford
	R. Delbourgo	University of Tasmania
	S. M. Hamberger	Australian National University
	P. Hannaford	CSIRO Materials Science & Technology
	R. F. Haynes	Australia Telescope National Facility
	B. S. Liley	University of Waikato
	M. A. Morrison	University of Oklahoma
	J. Oitmaa	University of New South Wales
	G. G. Shute	University of Melbourne
	E. Weigold	Flinders University

Managing Editor

R. P. Robertson

Annual subscription

Australia and New Zealand
\$A195 (surface)

Other countries:
\$US195 (surface-air-lifted)

Personal: \$A70 or \$US70

Back issues: \$A30

Issued six times a year

ISSN 0004-9506
© CSIRO Australia 1990

The Notice to Authors is published in the first issue of each volume. Copies are available on request.

All inquiries and manuscripts should be forwarded to the

Managing Editor,
Australian Journal of Physics,
P.O. Box 89,
East Melbourne, Vic. 3002, Australia.

Telephone (03) 418 7377
Telex AA 30236
Fax: Australia (03) 419 4096
International (613) 419 4096

Permission to photocopy items from this journal is granted by CSIRO to libraries and other users registered with the Copyright Clearance Center (CCC), provided that the stated fee for each copy is paid directly to the CCC, 27 Congress Street, Salem, MA 01970, U.S.A. Special requests should be addressed to the Managing Editor, Australian Journal of Physics, at the address above.

Australian Journal of Physics

A journal for the publication of original research in all branches of physics

Contents Volume 43 Number 1 1990

Elementary Particles and Fields

Tumbling for exotic fermionic representations in grand unified models.
Dariusz K. Grech 1

Nuclear Physics

Which potentials have to be surface peaked to reproduce large angle
proton scattering at high energy? *Jacques Raynal* 9

Atomic and Molecular Physics

The momentum transfer cross section for krypton. *Jim Mitroy* 19

Fluids, Plasmas and Electric Discharges

A Monte Carlo investigation of $\mathbf{E} \times \mathbf{B}$ discharges in molecular nitrogen.
Michael J. Brennan, Andrew M. Garvie and Lesley J. Kelly 27

Ion densities in low temperature nitrogen plasmas.
I. J. Donnelly and E. K. Rose 45

Characteristics of the solitary waves in multicomponent plasmas.
G. C. Das and B. Karmakar 65

Condensed Matter

Correction of X-ray intensities for multiple diffraction: Effects on atomic
parameters and charge density. *Bjørn C. Hauback, Frode Mo and
Gunnar Thorkildsen* 77

Thermal expansion of InBi at low temperatures. *G. K. White,
J. G. Collins and J. E. Schirber* 93

[Continued overleaf]

Geophysics, Astronomy and Astrophysics

Elevated duct effects on radar ranges using an airborne microwave refractometer. *S. B. S. S. Sarma* 99

Predictability of the 12-month running averaged sunspot number in the presence of an 8-month quasi-periodicity on a solar cycle. *P. K. Pasricha, S. Aggarwal, B. M. Reddy, V. Baskakov and O. P. Kolomitsev* 107

Delayed inflation of a closed cosmological model driven by the false vacuum in five dimensions. *C. Wolf* 117

Australian Journal of Physics

A journal for the publication of original research in all branches of physics

Contents Volume 43 Number 2 1990

Papers presented at the Australia-USSR workshop on the Early Universe held at Mt Stromlo Observatory, Canberra, 28-29 June 1989

Introduction. *K. C. Freeman* 121

Primordial perturbations, early evolution and dark matter in the universe.
V. N. Lukash 123

The epoch of galaxy formation. *P. J. Quinn* 135

Formation of the structure of the universe: Observational aspects.
Jaan Einasto 145

Large scale structure of the universe: Theoretical problems. *E. Saar* 159

The Great Attractor—A cosmic string? *D. S. Mathewson* 167

Spectral distortions of the relic radiation from pregalactic dust and decay of the unstable particles. *P. D. Nasel'sky and I. D. Novikov* 179

The global Hubble constant. *N. Visvanathan* 189

The Lyman α forest in QSOs: A window on intergalactic clouds at high redshift. *Richard W. Hunstead and Max Pettini* 211

Metal enrichment, dust and star formation in high-redshift galaxies.
Max Pettini and Richard W. Hunstead 227

Flat-spectrum radio sources from the Parkes 2.7 GHz survey—A study of a complete sample. *Ann Savage, David L. Jauncey, Graeme L. White, Bruce A. Peterson, W. L. Peters, Samuel Gulkis and J. J. Condon* 241

The clustering and evolution of QSOs. *B. J. Boyle* 251

Analysis of the astrophysical significance of radio source counts obtained in different frequency ranges. *K. P. Sokolov* 263

Evolutionary studies of galaxies at intermediate redshifts. *W. J. Couch* 271

Australian Journal of Physics

A journal for the publication of original research in all branches of physics

Contents Volume 43 Number 3 1990

Nuclear Physics

K-capture in the decay of ^{191}Pt . *H. S. Binarh, Harjinder Singh, S. S. Ghuman and H. S. Sahota* 283

Atomic & Molecular Physics

Distorted-wave Born approximation for the ionisation of hydrogen by electrons. *I. E. McCarthy and X. Zhang* 291

Classical Areas of Phenomenology

Self-focussing of laser beams in cadmium manganese telluride $\text{Cd}_{0.4}\text{Mn}_{0.6}\text{Te}$. *X. D. Dai, Y. Ito and Y. H. Ja* 303

Fluids, Plasmas and Electric Discharges

Nonlinear instability of circularly polarised waves in a magnetised relativistic plasma. *S. N. Paul* 311

Soliton characteristics at the critical density of negative ions in ion-beam plasmas. *G. C. Das and Kh. I. Singh* 319

Condensed Matter

Variational solutions of the Hubbard model for the bcc lattice. *C. M. Villet and W.-H. Steeb* 333

Fabrication of superconducting YBCO thin films on YSZ substrates. *A. Bailey, G. Alvarez, T. Puzzer, D. N. Matthews, K. Sealey, G. J. Russell and K. N. R. Taylor* 347

Geophysics, Astronomy and Astrophysics

Annual reconstruction of the solar cycle from atmospheric ^{14}C variations. *J. O. Murphy* 357

Calculations on the cosmic ray anisotropy above 10^{17} eV. *A. G. K. Smith and R. W. Clay* 373

Australian Journal of Physics

A journal for the publication of original research in all branches of physics

Contents Volume 43 Numbers 4 & 5 1990

Papers presented at the Workshop on Interfaces in Molecular, Electron and Surface Physics, held at Fremantle, Australia, on 4-7 February 1990

Guest Comment. *Andris Stelbovics* 389

Imaging semiconductors, metals and molecules with scanning tunneling microscopy. *R. J. Wilson, S. Chiang and D. D. Chambliss* 393

Applications of lasers to collision studies. *W. R. MacGillivray and M. C. Standage* 401

Electronic structure of atoms, molecules and solids from (e, 2e) studies. *I. E. McCarthy* 419

The general MCSCF method with full symmetry reduction. *Clemens C. J. Roothaan* 439

Auger photoelectron coincidence spectroscopy. *S. M. Thurgate* 443

Effects of diffraction on the (e, 2e) reaction in crystals. *L. J. Allen, I. E. McCarthy, V. W. Maslen and C. J. Rossouw* 453

A review of (e, 2e) studies in thin films and some recent results. *J. F. Williams and P. A. Hayes* 465

A study of L^2 approximations in atomic scattering. *A. T. Stelbovics and T. Winata* 485

Applications of low-energy electron diffraction to ordering at crystal and quasicrystal surfaces. *E. G. McRae and R. A. Malic* 499

A LEED fine structure study of oxygen adsorption on Cu(001) and Cu(111). *G. Hitchen, S. M. Thurgate and P. J. Jennings* 519

Auger lineshape analysis of disorder and rehydrogenation induced changes in the electronic structure of silicon surfaces. *C. P. Lund, B. W. Clare, J. C. L. Cornish, G. T. Hefter, P. J. Jennings and C. Klauber* 535

[Continued overleaf]

- (e, 2e) studies of atoms—some recent developments. *Erich Weigold* 543
- Uses of spin-polarised electrons in fundamental electron-atom collision processes and the analysis of magnetic microstructures. *Michael H. Kelley* 565
- The growth of semiconductor thin films studied by RHEED. *G. L. Price* 583
- The study of surfaces using ion beams. *D. J. O'Connor, B. V. King, R. J. MacDonald, Y. G. Shen and Xu Chen* 601
- Linear and nonlinear light scattering from the surfaces of liquids. *A. D. Buckingham* 617
- Auger electron spectra of molecules: The first row hydrides. *F. P. Larkins, L. C. Tulea and E. Z. Chelkowska* 625
- Anisotropy parameters and adiabatic approximations for two-electron atoms and ions. *Joseph Macek* 641
- Photoelectron spectroscopy of solids—VUV bandstructure studies. *Robert Leckey and John Riley* 651
- Low energy electron scattering from H₂. *M. J. Brunger, Stephen J. Buckman and D. S. Newman* 665
- Spectroscopy and structure of aromatic-rare gas cluster ions. *Ruth I. McKay, Evan J. Bieske, Ian M. Atkinson, Frederick R. Bennett, Andrew J. Bradley, Mark W. Rainbird, Andrew B. Rock, Angelo S. Uichanco and Alan E. W. Knight* 683

Australian Journal of Physics

A journal for the publication of original research in all branches of physics

Contents Volume 43 Number 6 1990

Feature Review

Particle acceleration processes in the solar corona. *D. B. Melrose* 703

Atomic and Molecular Physics

The drift velocity of electrons in water vapour at low values of E/N .
B. Cheung and M. T. Elford 755

Fluids, Plasmas and Electric Discharges

An experimental investigation of electron transport in $\mathbf{E} \times \mathbf{B}$ discharges.
M. J. Brennan and A. M. Garvie 765

A tomographic investigation of variations in the excited state populations of $\mathbf{E} \times \mathbf{B}$ discharges. *A. M. Garvie and M. J. Brennan* 779

Condensed Matter

X-ray diffraction investigation of epitaxial layers of CdTe on sapphire.
Andrew W. Stevenson and Geoff N. Pain 793

Astronomy and Astrophysics

Radio source scintillations through comet tails revisited: Comet Wilson (1987).
O. B. Slee, A. D. Bobra, D. Waldron and J. Lim 801

Corrigenda to: Linear force-free magnetic fields and coronal models.
C. J. Durrant 813

Fabrication of superconducting YBCO thick films on YSZ substrates.
*A. Bailey, G. Alvarez, T. Puzzer, D. N. Matthews, K. Sealey,
G. J. Russell and K. N. R. Taylor* 813
