### Platinum and Lanyard Sponsor

Schlumberger is the world's leading supplier of technology, integrated project management and information solutions to customers working in the oil and gas industry worldwide. With approximately 126 000 employees in more than 85 countries, Schlumberger provides the industry's widest range of products and services from exploration through production.

WesternGeco provides industry leading seismic acquisition technologies and innovative techniques to address specific survey and imaging objectives in any environment.

Through their other business segments Schlumberger supplies a wide range of services and products from their worldwide multiclient seismic data library and advanced seismic data processing through directional drilling, well cementing and stimulation, well completions and productivity to consulting, software, information management and IT infrastructure services that support core industry operational processes.

Schlumberger and WesternGeco offer its clients four key advantages:

*WesternGeco's Amazon Conqueror being launched in Germany*

- Deep domain knowledge of exploration and production operations gained through more than 80 years of experience
- The service industry's longest commitment to technology and innovation through a network of 125 research and engineering technology centres
- A global reach coupled to strong local experience and the diversity in thought, background and knowledge that more than more than 140 nationalities bring
- A commitment to excellence in service delivery anytime, anywhere.

### Gold Sponsor

BHP Billiton is a leading global resources company. It is among the world's largest producers of major commodities including iron ore, aluminium, coal, copper, manganese, nickel, silver and uranium, with substantial interests in oil and gas. BHP Billiton's principal iron ore operations are based in the Pilbara region of

Western Australia and include an integrated system of four major mining hubs, more than 1300 kilometres of rail and two world-class port facilities in Port Hedland. In financial year 2014, Western Australia Iron Ore achieved record production of 225 million tonnes of iron ore per annum (100% basis), with the business projected to grow to 290 million tonnes per annum. This year, the company officially opened its newest iron ore mine, Jumblebar, located 40 kilometres east of Newman, which will continue to play a key role in the growth of the iron ore business. BHP Billiton is committed to the safety of its people and to the communities in which it operates. BHP Billiton Iron Ore's Community Development Program has contributed more than A\$275 million over the past five years to health, education, Indigenous development and community infrastructure initiatives in Western Australia.

Petroleum Geo-Services (PGS) is a leading, worldwide geophysical company providing an extensive range of seismic services and products for the petroleum industry, including

seismic data acquisition, processing, reservoir monitoring and analysis, interpretation and electromagnetic studies. The company also possesses the world's most extensive 3D MultiClient data library. With its headquarters in Oslo, Norway, the company has over 35 offices worldwide in 25 different countries with larger regional offices in London, Houston and Singapore. The company is listed on the Oslo stock exchange (OSE: PGS).

Headquartered in Bethesda, Maryland, Lockheed Martin is a global security and aerospace company that employs approximately 113 000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services.

For more than three decades, Lockheed Martin has provided the world's only moving-based gravity gradiometer capabilities. Gravity gradient data is effectively used to help identify host geologies that are indicative of hydrocarbons or mineral ore bodies. Integration of gravity and other geophysical tools such as seismic, magnetic and electro-magnetics provides for a robust exploration data set.

**Rio Tinto**

Rio Tinto is a leading global mining and metals company. Our focus is on finding, mining and processing the Earth's mineral resources in order to maximise value for our shareholders. We have the people, capabilities and resources to supply a world hungry for the metals and minerals that are used in everyday life. Our 66 000 people work in more than 40 countries across six continents, including in some of the most difficult terrains and climates. We are strongly represented in Australia and North America and also have significant businesses in Asia, Europe, Africa and South America. With headquarters in the United Kingdom, our Group comprises Rio Tinto plc – a London and New York Stock Exchange listed company – and Rio Tinto Limited, which is listed on the Australian Securities Exchange. This global presence, and our expertise in technology and marketing, enables us to supply the right product, at the right quality, at the right time. Our major products are aluminium, copper, diamonds, gold, industrial minerals (borates, titanium dioxide and salt), iron ore, thermal and metallurgical coal and uranium. From our diverse portfolio, we supply the metals and minerals that help the world to grow.

#### Bronze Sponsors

Adrok develops and uses advanced technology to supply geophysical services for locating, identifying and mapping subsurface natural resources. We provide our clients with measurements of the subsurface natural resources, rock types and rock sequences before drilling. We call our technology Atomic Dielectric Resonance. We call our services Predrilling Virtual Logging.

CGG is a fully integrated geoscience company providing leading geological, geophysical and reservoir capabilities to its broad base of customers primarily from the global oil and gas industry. Its Equipment, Acquisition and Geology, Geophysics & Reservoir (GGR) divisions bring value across all aspects of natural resource exploration and exploitation.

AngloGold Ashanti Ltd is a global gold mining and exploration company with a diverse portfolio of 20 operations in 10 countries. In Australia the company operates the Sunrise Dam (100%) and Tropicana (70% and manager) gold mines.

AngloGold Ashanti produces approximately 4 million ounces of gold annually and is listed on the Johannesburg, New York and Australian Securities Exchanges.

CSIRO is a powerhouse of ideas, technologies and skills for building prosperity and sustainability for government and industry. CSIRO's geophysics capabilities are deployed in cutting-edge research for the minerals and energy resources sectors. Find out how partnering with CSIRO's geophysical expertise can give your company the competitive edge in innovation.
