Fig. S1. Immunohistochemical staining of (a, b) mouse and (c–f) human ovaries following pre-incubation of the antibody with (b, d, f) and without (a, c, e) recombinant activin C. Scale bar 100 μm (a–d) and 25 μm (e, f).
**Fig. S2.** Western blots of (a) WT mouse ovary protein and (b) recombinant activin A (-A), activin AC (-AC) and activin C (-C) detected with anti-activin-βC.
