Volume 44      Issue 5–6      2022

### Special issue: NRM in the Rangelands – Shaping our Future – ARS Conference Longreach QLD 2021

Guest Editors: Dr Peter O'Reagain, Mr Paul Jones, Dr Nicole Spiegel

#### FOREWORD

A shared purpose: increasing environmental, community and industry resilience in the Australian rangelands through improved natural resource management

*Dionne Walsh and Leanne Kohler*

261

#### RESEARCH PAPERS

Using digital photography to monitor changes in biocrusts and ground cover in a savanna rangeland

*Than Myint Swe, Wendy J. Williams, Susanne Schmidt, Andries Potgieter, Robyn Cowley, Vincent Mellor, Colin Driscoll and Yan Zhao*

263

Breaking the wildfire cycle: progressive fire management can shift fire regimes and improve ecosystem condition. A case study from a large conservation reserve in northern Australia

*Lea Ezzy*

279

A novel stem-applied herbicide-capsule methodology for control of the invasive cactus *Cereus uruguayanus*

*Leisa Bradburn, Shane Campbell, Vincent Mellor and Victor Galea*

289

Social-identity dynamics in rural communities: a motive for resistance to change

*Saleena Ham*

299

Changes in land management practices have reduced wind erosion in the cropping areas of far south-western NSW, Australia

*John F. Leys, Tanisha Shields, Sean R. Murphy and Terry Koen*

309

Fortifying the financial and environmental capital banks in commercially grazed rangelands

*D. Walsh and P. R. Holmes*

321

Can we benchmark annual ground cover maintenance?

*Terrence S. Beutel and F. Patrick Graz*

333

Dust-storm frequencies, community attitudes, government policy and land management practices during three major droughts in New South Wales, Australia

*John Leys, Stephan Heidenreich, Stephen White, Juan Guerschman and Craig Strong*

343
