Table S1. Total captures of all reptile species in the twenty four sites in Dryandra State Forest and Wandoo

National Park over 13, 440 trap nights.

| Family       | Species                                 | Total captures |
|--------------|---|----------------|
| Gekkonidae   | <i>Crenadactylus ocellatus</i>          | 3              |
|              | <i>Diplodactylus granariensis</i>       | 12             |
|              | <i>Diplodactylus pulcher</i>            | 1              |
|              | <i>Nephrurus milii</i>                  | 3              |
|              | <i>Oedura reticulata</i>                | 5              |
| Scincidae    | <i>Cryptoblepharus buchananii</i>       | 34             |
|              | <i>Ctenotus schomburgkii</i>            | 20             |
|              | <i>Egernia kingii</i>                   | 1              |
|              | <i>Liopholis (Egernia) multiscutata</i> | 3              |
|              | <i>Egernia napoleonis</i>               | 6              |
|              | <i>Eremiascincus richardsonii</i>       | 5              |
|              | <i>Lerista distinguenda</i>             | 31             |
|              | <i>Menetia greyii</i>                   | 20             |
|              | <i>Morethia obscura</i>                 | 49             |
|              | <i>Tiliqua rugosa rugosa</i>            | 5              |
| Polypodiidae | <i>Lialis burtonis</i>                  | 1              |
| Elapidae     | <i>Neelaps bimaculatus</i>              | 1              |
|              | <i>Parasuta gouldii</i>                 | 1              |
|              | <i>Simoselaps bertholdi</i>             | 1              |
|              | unidentified elapid                     | 1              |
| Agamidae     | <i>Pogona minor</i>                     | 7              |
| Varanidae    | <i>Varanus gouldii</i>                  | 5              |
| Typhlopidae  | <i>Ramphotyphlops hamatus</i>           | 2              |
