Front cover:

APEA annually invites drafting personnel in member companies to submit a design for the *APEA Journal* cover. This year's cover design represents the sharpening of focus now taking place in all areas of the oil exploration and production industry. The designer, Henryk Wojcik of Esso, says: 'The cover concept uses a graphic medium to illustrate the oil industry's increasingly sharpening focus. The icons represent vital elements of the business: maximising earnings, improving technology and the industry's concern for the environment.' As the designer of this year's design competition, Henryk receives a free trip to the APEA Conference. He is a member of the Graphics Section, Esso Australia Limited. Henryk has had 10 years design experience. After his training at Swinburne University he was involved in traditional publishing and illustration for the commercial sector and the health industry. He joined Esso's Computer Graphics Group two years ago and works on publishing design and illustration for various departments within the company.
