Front cover: This year's cover design is by Andy Meier of Q Multimediu Pty Ltd, Perth, WA. The design combines a number of images to express the theme 'Oil and Gas: the Energy for Growth'. The abstract seismic image is based on a portion of line WAS 7620, published by Marita Bradshaw and co-authors of AGSO in the 1998 PESA WABS 2 Symposium Proceedings. The donkey pump is a WAPET photograph from Barrow Island. The old rig is the Oakes-Durack bore in northern WA in 1923, the photograph being part of the collection of the Geological Survey of Western Australia. The image of Perth was provided by P.G. Purcell. Other small images are from Q's stock files. The co-operation of all individuals and organisations in agreeing to the use of these images is gratefully acknowledged.
