

ANIMAL PRODUCTION SCIENCE

CONTENTS Volume 54, Issue 3, 2014, 221–362

- Increasing home-grown forage consumption and profit in non-irrigated dairy systems. 1. Rationale, systems design and management
D. F. Chapman, J. Hill, J. Tharmaraj, D. Beca, S. N. Kenny and J. L. Jacobs 221–233
- Increasing home-grown forage consumption and profit in non-irrigated dairy systems. 2. Forage harvested
J. Tharmaraj, D. F. Chapman, J. Hill, J. L. Jacobs and B. R. Cullen 234–246
- Increasing home-grown forage consumption and profit in non-irrigated dairy systems. 3. Intake, milk production and composition, bodyweight and body condition score
J. Hill, D. F. Chapman, J. Tharmaraj, J. L. Jacobs and B. R. Cullen 247–255
- Increasing home-grown forage consumption and profit in non-irrigated dairy systems. 4. Economic performance
D. F. Chapman, D. Beca, J. Hill, J. Tharmaraj, J. L. Jacobs and B. R. Cullen 256–262
- Dietary ratios of maize silage to lucerne hay affect feed intake, chewing activity and milk production of dairy cows
A. Akbari-Afjani, A. Zali, M. Gangkhanlou, M. Dehghan-Banadaky, S. M. Nasrollahi and W. Z. Yang 263–269
- Changes in the group associations of free-ranging beef cows at calving
A. Finger, K. P. Patison, B. M. Heath and D. L. Swain 270–276
- Behavioural, follicular and hormonal characteristics of the oestrous cycle of Mexican Criollo cattle
A. Quezada-Casasola, L. Avendaño-Reyes, J. A. Ramírez-Godínez, U. Macías-Cruz and A. Correa-Calderón 277–284
- Effect of elevated temperatures on bovine corpus luteum function: expression of heat-shock protein 70, cell viability and production of progesterone and prostaglandins by cultured luteal cells
Makoto Iwazawa and Tomas J. Acosta 285–291
- Trends in greenhouse gas emissions from dairy cattle in Mexico between 1970 and 2010
J. A. Rendón-Huerta, J. M. Pinos-Rodríguez, J. C. García-López, L. G. Yáñez-Estrada and E. Kebreab 292–298
- The effect of essential oils of *Zataria multiflora* and *Mentha spicata* on the *in vitro* rumen fermentation, and growth and deaminative activity of amino acid-fermenting bacteria isolated from Mehraban sheep
M. Taghavi-Nezhad, D. Alipour M. D. Flythe, P. Zamani and G. Khodakaramian 299–307
- Use of a threshold of flystrike risk as a method for treatment intervention in the management of flystrike in sheep
Victoria Percival and Brian Horton 308–318
- Insulin secretion, body composition and pig performance are altered by feeding pattern
Ronald E. Newman, Jeffery A. Downing, Peter C. Thomson, Cherie L. Collins, David J. Henman and Stuart J. Wilkinson 319–328
- Dietary fatty acids affect the growth, body composition and performance of post-weaning gilt progeny
S. J. Wilkinson, J. A. Downing, P. C. Thomson and R. E. Newman 329–338
- Steam-pelleting temperatures and grain variety of finely ground, sorghum-based broiler diets. 1. Influence on growth performance, relative gizzard weights, nutrient utilisation, starch and nitrogen digestibility
P. H. Selle, S. Y. Liu, A. Khoddami J. Cai and A. J. Cowieson 339–346
- Nutritional evaluation of dried larvae and pupae meal of the housefly (*Musca domestica*) using chemical- and broiler-based biological assays
E. Pieterse and Q. Pretorius 347–355
- Artificial insemination in Payoya goats: factors affecting fertility
Francisco Arrebola, Olga González, Rafael Torres and José-Alfonso Abecia 356–362
