

ANIMAL PRODUCTION SCIENCE

CONTENTS Volume 52, Issue 5, 2012, 287–381

Nitrogen metabolism and recycling in yaks (*Bos grunniens*) offered a forage–concentrate diet differing in N concentration

X. S. Guo, Y. Zhang, J. W. Zhou, R. J. Long, G. S. Xin, B. Qi, L. M. Ding and H. C. Wang 287–296

Persistence of orally administered *Megasphaera elsdenii* and *Ruminococcus bromii* in the rumen of beef cattle fed a high grain (barley) diet

Athol V. Klieve, Stuart R. McLennan and Diane Ouwerkerk 297–304

Muscle-fibre types in porcine *longissimus* muscle of different genotypes and their association with the status of energy metabolism

Xiao-Ming Men, Bo Deng, Zi-Wei Xu and Xin Tao 305–312

The yield of peptides and amino acids following acid hydrolysis of haemoglobin from porcine blood

Carlos Alvarez, Manuel Rendueles and Mario Diaz 313–320

Genetic parameter estimates for growth traits of Gansu Alpine Finewool sheep

Wenhui Li and Ian W. Purvis 321–328

Prediction of mortality and conception rates of beef breeding cattle in northern Australia

D. G. Mayer, G. M. McKeon and A. D. Moore 329–337

True dry matter digestibility of feeds evaluated *in situ* with different bags and *in vitro* using rumen fluid collected from intact donor cows

Franco Tagliapietra, Mirko Cattani, Ida K. Hindrichsen, Hanne H. Hansen, Stefania Colombini, Lucia Bailoni and Stefano Schiavon 338–346

Preliminary investigations into the effect of ostrich feather lice (*Struthiolipeurus struthionis*) on production and leather quality

A. Engelbrecht and S. W. P. Cloete 347–353

Effects of backgrounding and finishing growth rates on P8 fat and intramuscular fat in *Bos taurus* steers

M. J. McPhee, S. Harden, D. L. Robinson, R. W. Dicker and V. H. Oddy 354–364

Prevalence of mimosine and DHP toxicity in cattle grazing *Leucaena leucocephala* pastures in Queensland, Australia

S. A. Dalzell, D. J. Burnett, J. E. Dowsett, V. E. Forbes and H. M. Shelton 365–372

Growth and carcass characteristics of crossbred lambs in various production systems

N. M. Fogarty and J. G. Mulholland 373–381
