POULTRY CRC: RESEARCH & INNOVATION

Foreword iii

Natural plant extracts and prebiotic compounds as alternatives to antibiotics in broiler chicken diets in a necrotic enteritis challenge model

J. K. Vidanaratchchi, L. L. Mikkelsen, C. C. Constantinoiu, M. Choct and P. A. Iji 1247–1259

Quantitative molecular assays for evaluating changes in broiler gut microbiota linked with diet and performance

V. A. Torok, C. Dyson, A. McKay and K. Ophel-Keller 1260–1268

Identification of differential duodenal gene expression levels and microbiota abundance correlated with differences in energy utilisation in chickens

Barbara M. Konsak, Dragana Stanley, Volker R. Haring, Mark S. Geier, Robert J. Hughes, Gordon S. Howarth, Tamsyn M. Crowley and Robert J. Moore 1269–1275

Close human presence reduces avoidance behaviour in commercial caged laying hens to an approaching human

L. E. Edwards, G. J. Coleman and P. H. Hemsworth 1276–1282

Examining the usefulness of a Y-maze choice method to measure the preferences of laying hens

N. A. Arnold and P. H. Hemsworth 1283–1290

Egg quality and age of laying hens: implications for product safety

J. R. Roberts, Kapil Chousalkar and Samiullah 1291–1297

The potential for probiotics to prevent reproductive tract lesions in free-range laying hens

S. Shini, A. Shini and P. J. Blackall 1298–1308

Odour, dust and non-methane volatile organic-compound emissions from tunnel-ventilated layer-chicken sheds: a case study of two farms

Mark Dunlop, Zoran D. Ristovski, Erin Gallagher, Gavin Parcsi, Robin L. Modini, Victoria Agranovski and Richard M. Stuetz 1309–1318
