## Crop/pasture agronomy and physiology

Effect of water supply on leaf area development, stomatal activity, transpiration, and dry matter production and distribution in young olive trees.

*María Gómez-del-Campo*

385

Preliminary results of an olive cultivar trial at high density.

*R. De la Rosa, L. León, N. Guerrero, L. Rallo, D. Barranco*

392

Managing production constraints to the reliability of chickpea (*Cicer arietinum* L.) within marginal areas of the northern grains region of Australia.

*J. P. M. Whish, P. Castor, P. S. Carberry*

396

Growth responses of cool-season grain legumes to transient waterlogging.

*Z. Solaiman, T. D. Colmer, S. P. Loss, B. D. Thomson, K. H. M. Siddique*

406

Changes in seed size and oil accumulation in *Brassica napus* L. by manipulating the source–sink ratio and excluding light from the developing siliques.

*Jeanie A. Fortescue, David W. Turner*

413

## Crop/pasture improvement and protection

Genotypic variability in sequence and expression of *HVA1* gene in Tibetan hulless barley, *Hordeum vulgare* ssp. *vulgare*, associated with resistance to water deficit.

*Gang Qian, Zhaoxue Han, Tao Zhao, Guangbing Deng, Zhifen Pan, Maoqun Yu*

425

Heritability, correlated response, and indirect selection involving spectral reflectance indices and grain yield in wheat.

*M. A. Babar, M. van Ginkel, M. P. Reynolds, B. Prasad, A. R. Klatt*

432

Genotypic variation in phosphorus utilisation of soybean [*Glycine max* (L.) Murr.] grown in various sparingly soluble P sources.

*C. Tang, Y. F. Qiao, X. Z. Han, S. J. Zheng*

443

Differential tolerance in wheat (*Triticum aestivum* L.) genotypes to metribuzin.

*S. G. L. Kleemann, G. S. Gill*

452

## Animal breeding and genetics

Genetic evaluation of crossbred lamb production. 3. Growth and carcass performance of second-cross lambs.

*R. A. Afolayan, N. M. Fogarty, V. M. Ingham, A. R. Gilmour, G. M. Gaunt, L. J. Cummins, T. Pollard*
