VOLUME 17

MELBOURNE
1964

AUSTRALIAN JOURNAL OF BIOLOGICAL SCIENCES

A medium for the publication of results of original scientific research in the biological sciences with special emphasis on the experimental phases. Volumes 1 to 5 issued as the Australian Journal of Scientific Research, Series B: Biological Sciences.

Published by the Commonwealth Scientific and Industrial Research Organization.
Issued quarterly, £2 per annum.

BOARD OF STANDARDS

The Board of Standards for this Journal is appointed by the Commonwealth Scientific and Industrial Research Organization and the Australian Academy of Science and consists of Professor W. P. Rogers (Chairman), Mr. A. E. Scott (Editor-in-Chief), Professor N. S. Bayliss, Dr. M. F. Day, Professor R. Street, and Professor J. S. Turner.

ADVISORY COMMITTEE

Acceptance of papers for this Journal is in the hands of an Advisory Committee appointed by the Board of Standards and consisting of Mr. A. E. Scott (Editor-in-Chief and Chairman), Dr. M. F. Day, Professor C. W. Emmens, Professor R. N. Robertson, Professor W. P. Rogers, and Professor J. S. Turner.

All enquiries and manuscripts should be forwarded to:

The Editor-in-Chief,
Editorial and Publications Section, CSIRO,
Sixth Floor,
372 Albert Street,
East Melbourne, C.2, Victoria

CONTENTS

NUMBER 1, FEBRUARY 1964

	PAGE
Inflorescence initiation in <i>Lolium temulentum</i> L. IV. Translocation of the floral stimulus in relation to that of assimilates. By L. T. Evans and I. F. Wardlaw	1
Inflorescence initiation in <i>Lolium temulentum</i> L. V. The role of auxins and gibberellins. By L. T. Evans	10
Inflorescence initiation in <i>Lolium temulentum</i> L. VI. Effects of some inhibitors of nucleic acid, protein, and steroid biosynthesis. By L. T. Evans ..	24
Induction of mitosis by sucrose in excised and attached dormant buds of sunflower (<i>Helianthus annuus</i> L.). By L. A. T. Ballard and S. G. Wildman	36
Root nodules on <i>Podocarpus lawrencei</i> and their ecological significance. By F. J. Bergersen and A. B. Costin	44
Studies on the comparative physiology of <i>Chara australis</i> . I. Growth pattern and gross cytology of the internodal cell. By Marie J. Peebles, F. V. Mercer, and T. C. Chambers	49
Ionic relations of cells of <i>Chara australis</i> . VII. The separate electrical characteristics of the plasmalemma and tonoplast. By G. P. Findlay and A. B. Hope	62
Organization resistance and the respiration climacteric. By Joan M. Bain and F. V. Mercer	78
Studies on the greening of dark-grown bean plants. I. Formation of chloroplasts from proplastids. By N. K. Boardman and Jan M. Anderson	86
Studies on the greening of dark-grown bean plants. II. Development of photochemical activity. By Jan M. Anderson and N. K. Boardman ..	93
The <i>in vivo</i> uptake and incorporation of radioisotopes into proteins of wheat endosperm. By Janet S. D. Graham, the Late R. K. Morton, and J. K. Raison	102
Transpiration from cotton leaves under a range of environmental conditions in relation to internal and external diffusive resistances. By R. O. Slatyer and J. F. Bierhuizen	115
The influence of several transpiration suppressants on transpiration, photosynthesis, and water-use efficiency of cotton leaves. By R. O. Slatyer and J. F. Bierhuizen	131
The effect of low temperature on phosphate esterification and cell membrane permeability in tomato fruit and cabbage leaf tissue. By T. L. Lewis and M. Workman	147

NUMBER I, FEBRUARY 1964 (*Continued*)

	PAGE
Studies on the metabolism of model compounds related to soil humic acid. I. The decomposition of <i>N</i> -(<i>o</i> -carboxyphenyl)glycine. By J. N. Ladd ..	153
The breakdown of asparagine, glutamine, and other amides by microorganisms from the sheep's rumen. By A. C. I. Warner	170
Fatty acid components of ovine plasma lipids during rumen development. By C. J. Masters	183
Fatty acid components of ovine tissue lipids during rumen development. By C. J. Masters	190
Fatty acid components of ovine extrahepatic tissues after rumen development. By C. J. Masters	200
The effects on rats of chronic exposure to 34°C. I. The effect of variations in the diet on growth and on the ability of mothers to rear pups to weaning age. By Pamela R. Pennycuik	208
The effects on rats of chronic exposure to 34°C. II. Growth. By Pamela R. Pennycuik	220
The effects on rats of chronic exposure to 34°C. III. Appetite and the efficiency of food conversion. By Pamela R. Pennycuik	236
The effects on rats of chronic exposure to 34°C. IV. Reproduction. By Pamela R. Pennycuik	245
Studies on ovalbumin. I. Denaturation by heat, and the heterogeneity of ovalbumin. By M. B. Smith	261
Studies on reduced wool. II. The identification of terminal <i>N</i> -acetylalanine in wool and extracted wool proteins. By I. J. O'Donnell and E. O. P. Thompson	271
Studies on reduced wool. III. Starch-gel electrophoresis of extracted wool proteins. By E. O. P. Thompson and I. J. O'Donnell	277
The isolation and properties of some soluble proteins from wool. VIII. The proteins of copper-deficient wool. By J. M. Gillespie	282
Central-link-degeneracy in protein coding. By D. C. Peaslee	301

Short Communications

Effect of benzoic acid and its derivatives on plant metabolism. VIII. Effect of amino derivatives of benzoic acid on respiration of starved and sucrose- fed etiolated barley leaves. By M. I. Naguib	314
Complex polymorphisms with recombination differing between sexes. By P. A. Parsons	317

NUMBER 2, MAY 1964

	PAGE
Juvenile photoperiodic sensitivity in <i>Anagallis arvensis</i> L. subsp. <i>foemina</i> (Mill.) Schinz & Thell. By L. A. T. Ballard and A. E. Grant Lipp ..	323
The uptake of sucrose by bean leaf tissue. I. The general nature of the uptake. By R. S. Vickery and F. V. Mercer	338
Photosynthesis of cotton leaves under a range of environmental conditions in relation to internal and external diffusive resistances. By J. F. Bierhuizen and R. O. Slatyer	348
Studies on the enzymic browning of apples. II. Properties of apple polyphenol-oxidase. By J. R. L. Walker	360
Studies on the comparative physiology of <i>Chara australis</i> . II. The fine structure of the protoplast. By T. C. Chambers and F. V. Mercer	372
Ionic relations of cells of <i>Chara australis</i> . VIII. Membrane currents during a voltage clamp. By G. P. Findlay	388
Ionic relations of cells of <i>Chara australis</i> . IX. Analysis of transient membrane currents. By G. P. Findlay and A. B. Hope	400
Translocation of labelled assimilates in the soybean. III. Translocation and other factors affecting leaf growth. By Stella L. Thrower	412
The evolution of non-additive genetic variance under artificial selection. I. Modification of dominance at a single autosomal locus. By B. D. H. Latter	427
Abundance of <i>Pythium</i> species in nursery soils in South Australia. By O. Vaartaja and M. Bumbieris	436
Products of anaerobic metabolism of tetrathionate by <i>Thiobacillus</i> X. By P. A. Trudinger	446
The metabolism of trithionate by <i>Thiobacillus</i> X. By P. A. Trudinger ..	459
Studies on marsupial nutrition. IV. Diet of the quokka, <i>Setonix brachyurus</i> (Quoy & Gaimard), on Rottnest Island, Western Australia. By G. M. Storr	469
A membrane preparation from insect flight muscle sarcosomes. By A. R. Gilby	482

NUMBER 2, MAY 1964 (*Continued*)

	PAGE
The enzymatic activity of bull testis and epididymal spermatozoa. By A. W. Blackshaw	489
The incidence of morphologically abnormal ova in sheep. By A. W. H. Braden	499
Models for the distribution on pasture of infective larvae of the gastrointestinal nematode parasites of sheep. By G. M. Tallis and A. D. Donald ..	504
Neogenesis of wool follicles. By A. G. Lyne and A. H. Brook	514
Studies on the follicle bulb of fibres. I. Mitotic and cellular segmentation in the wool follicle with reference to ortho- and parasegmentation. By I. E. B. Fraser	521
The growth and composition of wool. II. The effect of casein, gelatin, and sulphur-containing amino acids given per abomasum. By P. J. Reis and the Late P. G. Schinckel	532
The isolation and properties of some soluble proteins from wool. IX. The proteins in wools of increased sulphur content. By J. M. Gillespie, P. J. Reis, and the Late P. G. Schinckel	548
On the prediction of partition coefficients and R_F values of peptides. By J. W. Legge and A. S. Morieson	561

Short Communications

Distribution of phosphorus during wheat grain development. By A. H. G. C. Rijven	572
The polyphenoloxidase of pear fruit. By J. R. L. Walker	575
Evidence for a four-sulphur intermediate in thiosulphate oxidation by <i>Thiobacillus</i> X. By P. A. Trudinger	577

NUMBER 3, AUGUST 1964

	PAGE
Studies of extrafascicular movement of water in the leaf. By D. F. Gaff, T. C. Chambers, and Katalin Markus	581
Sectioning and electron microscopy of eucalypt leaf waxes. By N. D. Hallam	587
Photosynthesis in relation to leaf orientation and light interception. By P. E. Kriedeman, T. F. Neales, and D. H. Ashton	591
The nature and genetic control of a red anthocyanin pigment in the root meristems of <i>Phalaris</i> . By J. R. McWilliam and C. J. Shepherd	601
The regulation of invertase synthesis in sugar-cane: effects of sugars, sugar derivatives, and polyhydric alcohols. By K. T. Glasziou and J. C. Waldron	609
Studies on the growth of the barley apex. II. On the initiation of internode elongation in the inflorescence. By P. B. Nicholls and L. H. May	619
Resistance mechanisms of <i>Oxalis pes-caprae</i> (soursob) to 2,4-dichlorophenoxy-acetic acid. By N. G. Marinos, Fay H. Chapman, and L. H. May	631
Pre-emergence rotting of peas in South Australia. I. Factors associated with the seed. By N. T. Flentje	643
Pre-emergence rotting of peas in South Australia. II. Factors associated with the soil. By N. T. Flentje	651
Pre-emergence rotting of peas in South Australia. III. Host-pathogen interaction. By N. T. Flentje and H. K. Saksena	665
The influence of soil moisture on infection of peas by <i>Pythium ultimum</i> . By A. Kerr	676
Mechanisms of variation in <i>Thanatephorus cucumeris</i> and <i>T. praticolus</i> . By N. T. Flentje and Helena M. Stretton	686
Pectolytic enzyme production by <i>Sclerotinia fructicola</i> (Wint.) Rehm, and its role in the pathogenesis of stone fruits. By C. Reinganum	705
The isolation and characterization of an RNA bacteriophage. By C. I. Davern	719
The inhibition and mutagenesis of an RNA bacteriophage by 5-fluorouracil. By C. I. Davern	726

NUMBER 3, AUGUST 1964 (*Continued*)

	PAGE
Oxidation of thiosulphate by intact cells of <i>Thiobacillus X</i> : effects of some experimental conditions. By P. A. Trudinger	738
Further data on the effect of ammonia on the termination of diapause in eggs of <i>Teleogryllus commodus</i> (Walk.) (Orthoptera: Gryllidae). By T. W. Hogan	752
An investigation of certain components of the venom of the female Sydney funnel web spider, <i>Atrax robustus</i> Cambr. By Catherine M. Gilbo and N. W. Coles	758
Variation of scutellar bristles in <i>Drosophila</i> . II. Effects of temperature. By Pamela R. Pennycook and A. Fraser	764
Crimp in wool: growth characteristics of well-crimped and abnormally crimped fibres. By R. E. Chapman and B. F. Short	771
Derivative recording in column chromatography. By M. V. Tracey	792

Short Communications

Kinins in germinating lettuce seed. By E. Barzilai and A. M. Mayer	798
Periodicity of basidiospore release in <i>Puccinia malvacearum</i> . By M. V. Carter and R. J. Banyer	801
Tyrosine metabolism in blowfly larvae at pupation. By R. H. Hackman and K. N. Saxena	803

NUMBER 4, NOVEMBER 1964

	PAGE
Effects of day length and light intensity on growth of barley. III. Vegetative development. By D. Aspinall and L. G. Paleg	807
Effect of calcium level in the substrate on the distribution of ^{45}Ca in subterranean clover (<i>Trifolium subterraneum</i> L.). By C. R. Millikan and B. C. Hanger	823
The formation of polyphosphate in <i>Banksia ornata</i> , an Australian heath plant. By D. W. Jeffrey	845
A study of root exudates by the fog-box technique. By M. F. Clayton and J. A. Lamberton	855
Carbohydrate utilization as a factor in plant growth. By R. L. Burt ..	867
Effects of metabolites and antimetabolites on the sporulation of <i>Peronospora tabacina</i> Adam. on tobacco leaf disks. By C. J. Shepherd and M. Mandryk ..	878
Properties of an iridescent virus from the beetle, <i>Sericesthis pruinosa</i> . By M. F. Day and E. H. Mercer	892
Observations with the electron microscope of myxoma virus on mosquito mouthparts. By B. K. Filshie	903
Radiation-induced reversion of transition mutants. By G. W. Grigg ..	907
Transmission ratios at the <i>T</i> -locus in the mouse: inter- and intra-male heterogeneity. By A. W. H. Braden and H. Weiler	921
The uptake of plasma lipid and some non-lipid constituents by the mammary gland of the cow. By P. E. Hartmann and A. K. Lascelles	935
The fate of intradermal doses of labelled amino acids in sheep. By A. M. Downes, L. F. Sharry, and A. R. Till	945
The chemical composition of wool. I. The separation and microscopic characterization of components produced by ultrasonic disintegration. By J. H. Bradbury and G. V. Chapman	960
Studies on reduced wool. IV. The isolation of a major component. By I. J. O'Donnell and E. O. P. Thompson	973
The fractionation of α -histones from chicken erythrocyte nuclei. I. The effect of ethanol concentration and pH on the fractional precipitation of α -histones. By J. T. Bellair and C. M. Mauritzen	990
The fractionation of α -histones from chicken erythrocyte nuclei. II. Fractions obtained by exclusion chromatography. By J. T. Bellair and C. M. Mauritzen	1001
<i>Short Communication</i>	
A note on the estimation of larval concentrations on pasture. By G. M. Tallis ..	1016
Index to Volume 17	1021
