

Subject Index

- Actomyosin systems, effects of pressure treatment on 197
- Adrenal cortex and thyroid gland interrelationships in the sheep 117
- Alcohol dehydrogenases:
Adaptedness of variants at a locus in *Bromus mollis* 389
Biochemical differences between, in *Drosophila melanogaster* 365
- Apoprotein, *see* protein
- Apovitellenin I:
Dimer-tetramer transition 317
Emu, comparison with hen 175
Primary structure of, in hen egg yolk 175
- Azotobacter vinelandii* nitrogenase, repression, derepression and activation of 147
- Bile secretion in anaesthetized sheep, effect of electrical stimulation of the vagus nerves on 351
- Biotin:
Biochemical role of, in fatty liver and kidney syndrome in chicks 429
Effect of, in diet, in fatty liver and kidney syndrome in chicks 419
- Boars, *see* pigs
- Boophilus microplus*:
Biochemical genetics of resistance in 265
Cellular responses to larval attachment and relationship to host resistance 499
Characterization of enzymes introduced into the host 487
Linkage and dominance characteristics of genes for resistance in 251
- Bromus mollis*, adaptedness of variants at an alcohol dehydrogenase locus 389
- Cattle tick, *see* *Boophilus microplus*
- Cell membrane complex of wool 43
- Chicks, fatty liver and kidney syndrome in 419, 429
- α -Chlorohydrin, and disruption of the metabolism, motility and morphology of ram spermatozoa 545
- Clovers, rugose leaf curl disease of 137
- Desulfovibrio gigas*, variations in the spectrum of desulfovibridin from 291
- Desulfovibridin from *Desulfovibrio gigas*, variations in the spectrum of 291
- Drosophila melanogaster*:
Biochemical differences between alcohol dehydrogenases 365
Developmental origin of even spacing between the microchaetes 131
Hybrid dysgenesis in 375
- Emu egg yolk apovitellenin I, comparison with hen 175
- Ewes:
Artificial induction of lactation in 357
Lactating, production of endogenous acetate by the liver in 33
Ovariectomized, effects of progesterone and oestradiol on RNA and protein metabolism in the genital tract and on survival of embryos in 565
- Fatty liver and kidney syndrome in chicks:
Effect of biotin in diet 419
Biochemical role of biotin 429
- Gaeumannomyces graminis* var. *tritici* survival in artificially colonized straw buried in naturally infested soil 163
- Glucagon secretion in the autotransplanted ovine pancreas 223
- Glucose and acetate metabolism in sheep at rest and during exercise 215
- Goat embryos, *in vitro* culture, storage and transfer of 125
- Grey kangaroo, methane production and digestibility measurements in 209
- Haematocrit, changes in, in intact and splenectomized sheep during feeding 533
- Haemoglobin, instability of DTNB-treated 181
- Haemoglobins of the shark. II 73
- Hen's egg yolk lipoprotein, apoproteins of 317
- Heptane treatment, effect of, on the response of sarcoplasmic reticulum preparations to phosphate 459
- Heterodontus portusjacksoni*, amino acid sequence of the haemoglobin α -chain 73
- Human chorionic gonadotrophin, effect of, on metabolism of sheep ovarian follicles 557
- Hybrid dysgenesis in *Drosophila melanogaster* 375
- Insect-control chemicals from plants. III 99
- Insulin secretion in the autotransplanted ovine pancreas 223
- Kangaroos:
Methane production and digestibility measurements 209
Paternal X inactivation system 245

- Kennedy* yellow mosaic virus 397
- Keratin component of birds' beaks, proteins of 467
- α -Keratins, high-sulphur proteins from 1, 11
- Kookaburra beak protein, sedimentation equilibrium studies on 481
- Lactation, artificial induction of, in ewes 357
- Lactogenesis, involvement of progesterone and prolactin in 357
- Liboedrus bidwillii*, toxic lignans from 99
- Linkage and dominance characteristics of genes for resistance in *Boophilus microplus* 251
- Lipoprotein, *see* protein
- Luteinizing hormone, solid-phase assay for 105
- Metatherian sex chromosomes, studies on. II 245
- Methane production and digestibility measurements in the grey kangaroo and sheep 209
- Mimosine, inhibition of wool follicle DNA synthesis by 189
- Monotreme proteins, studies on. VII 57
- Mouse hair proteins 1, 11
- Mouse plasma, solid-phase assay for luteinizing hormone in 105
- Oestradiol, effect on RNA and protein metabolism in the genital tract and on survival of embryos in the ovariectomized ewe 565
- Ornithorhynchus anatinus*, amino acid sequence of myoglobin 57
- Ovarian follicles, sheep, effect of human chorionic gonadotrophin on metabolism of 557
- Penicillinase, alternative coupling procedure for preparing activated sepharose for affinity chromatography of 305
- Peronospora tabacina*, sporulation of, on tobacco leaves 281
- Pigs:
- Examination of some processing methods for freezing boar semen 325
 - Fertility test of frozen boar semen 335
 - Polypeptides from serum low-density lipoproteins 301
- Platypus, *see* *Ornithorhynchus anatinus*
- Progesterone:
- Effect on RNA synthesis and protein metabolism in the genital tract and on the survival of embryos in the ovariectomized ewe 565
 - Involvement in lactogenesis in ewes 357
- Prolactin, involvement in lactogenesis in ewes 357
- Proteins:
- High-sulphur, from α -keratins 1, 11
 - High-sulphur, in developing wool follicles 453
 - Keratin component of birds' beaks 467
 - Kookaburra beak, sedimentation equilibrium studies on 481
 - Monotreme, studies on 57
 - Polypeptides from serum low-density lipoproteins of pigs 301
 - Studies on the apoproteins of the major lipoprotein of the yolk of hen's eggs 317
- Rat, effect of semi-starvation on the total body composition and absorptive function of the small intestine of the young, adult female 341
- Rams, *see* sheep
- Repression, derepression and activation of nitrogenase in *Azotobacter vinelandii* 147
- Rugose leaf curl disease of clovers 137
- Sarcoplasmic reticulum preparations, effect of heptane treatment on the response of, to phosphate 459
- Sedimentation equilibrium studies on protein from kookaburra beak 481
- Semen, boar:
- Examination of some processing methods for freezing 325
 - Frozen, fertility test of 335
- Semi-starvation, effect of, on the total body composition and absorptive function of the small intestine of the young adult female rat 341
- Shark, *see* *Heterodontus portusjacksoni*
- Sheep:
- Autotransplanted pancreas: glucagon and insulin secretion 223
 - Changes in plasma volume and haematocrit during feeding 533
 - Disruption of the metabolism, motility and morphology of spermatozoa by injection of α -chlorohydrin into rams 545

- Effect of electrical stimulation of the vagus nerves on bile secretion in anaesthetized sheep 351
- Glucose and acetate metabolism, at rest and during exercise 215
- Interrelationships between the thyroid gland and adrenal cortex during fear, cold and restraint 117
- Metabolism of cystine by Merinos genetically different in wool production 513
- Methane production and digestibility measurements in 209
- Ovarian follicles, effect of human chorionic gonadotrophin on metabolism of 557
- Transfer of sulphur to the digestive tract 499
- Sirex noctilio*, mucus secretion of 21
- Soft brome grass, *see Bromus mollis*
- Spermatozoa:
- Disruption of the metabolism, motility and morphology by injection of α -chlorohydrin into rams 545
- Sus domesticus*, *see* pigs
- Thyroid gland and adrenal cortex interrelationships in the sheep 117
- Tick, cattle, *see Boophilus microplus*
- Tobacco leaves, sporulation of *Peronospora tabacina* on 281
- Tropomyosins, conformational stabilities of 405
- Tymovirus, *Kennedya* yellow mosaic virus 397
- Vagus nerves, effect of electrical stimulation of, on bile secretion in anaesthetized sheep 351
- Wood wasp, *see Sirex noctilio*
- Wool, chemical composition of. XV 43
- Wool fibres:
- Incorporation of ^{35}S into, and rates of entry of cystine into plasma measured with a single intravenous injection of L- $^{[35]\text{S}}$ cystine 487
- Wool follicles:
- DNA synthesis, inhibition by mimosine and related 4(1*H*)-pyridones 189
 - Location of a high-sulphur protein in 453
- Wool roots, preparation of metabolically active cell suspensions from 443
- Zona pellucida of sheep ova 237
