

AUSTRALIAN JOURNAL OF BOTANY

A journal for papers in ecology and ecophysiology; conservation biology and biodiversity; forest biology and management; cell and molecular biology; palaeobotany; reproductive biology and genetics; mycology and pathology; and structure and development

Contents Volume 56 Issue 5 2008

Turner Review No. 18

Greenhouse gas fluxes from natural ecosystems.
Ram C. Dalal and Diane E. Allen 369–407

Ecology and Ecophysiology

Water relations and mineral nutrition of *Triodia* grasses on desert dunes and interdunes.
Alasdair M. Grigg, Erik J. Veneklaas and Hans Lambers 408–421

Plant trait–environmental linkages among contrasting landscapes and climate regimes in temperate eucalypt woodlands.
Karen E. Wills and Peter J. Clarke 422–432

Short Communication. Some wild bamboo clumps contain more than one genet.
Donald C. Franklin, Shingo Kaneko, Nozomi Yamasaki and Yuji Isagi 433–436

Conservation Biology and Biodiversity

Community structure of a rhodolith bed from cold-temperate waters (southern Australia).
A. S. Harvey and F. L. Bird 437–450

Morphological and molecular variation in *Conospermum triplinervium* (Proteaceae), the tree smokebush: implications for bushland restoration.
Elizabeth Sinclair, Belinda Cheetham, Siegfried Krauss and Richard Hobbs 451–460
