

AUSTRALIAN JOURNAL OF BOTANY

A journal for papers in ecology and ecophysiology; conservation biology and biodiversity; forest biology and management; cell and molecular biology; palaeobotany; reproductive biology and genetics; mycology and pathology; and structure and development

Contents Volume 55 Issue 5 2007

Turner Review No. 14

Roots of the Second Green Revolution.
Jonathan P. Lynch 493–512

Conservation Biology and Biodiversity

Microsatellite and cpDNA variation in island and mainland populations of a regionally rare eucalypt, *Eucalyptus perriniana* (Myrtaceae).
Damien A. Rathbone, Gay E. McKinnon, Brad M. Potts, Dorothy A. Steane and René E. Vaillancourt 513–520

Relating pine-litter intrusion to plant-community structure in native eucalypt woodland adjacent to *Pinus radiata* (Pinaceae) plantations.
Andrew C. Baker, Brad R. Murray and Grant C. Hose 521–532

The extent of dryland salinity in remnant woodland and forest within an agricultural landscape.
Julian A. Seddon, Andre Zerger, Stuart J. Doyle and Sue V. Briggs 533–540

Vitrification-based shoot tip cryopreservation of *Carica papaya* and a wild relative *Vasconcellea pubescens*.
Sarah E. Ashmore, Roderick A. Drew and Mahmoud Azimi 541–547

Reproductive Biology and Genetics

Short Communication. Extent of clonality, genetic diversity and decline in the endangered mallee *Eucalyptus imlayensis*.
Elizabeth A. James and Keith L. McDougall 548–553

Sex ratios, fruit set and size-class structure in the threatened, gynodioecious sand-dune species *Pimelea arenaria* (Thymelaeaceae) from New Zealand.
Meryl F. Merrett 554–560

Ecology and Ecophysiology

Reflectance and phenolics of green and glaucous leaves of *Eucalyptus urnigera*.
D. C. Close, N. J. Davidson, C. B. Shields and R. Wiltshire 561–567

Geographic variation in extrafloral nectaries in the ant-associated plant genus *Adriana* (Euphorbiaceae) and its relationship to water availability.
M. A. Whalen and D. A. Mackay 568–575

Forest Biology and Management

Does the addition of litter from N-fixing *Acacia mearnsii* accelerate leaf decomposition of *Eucalyptus globulus*?
W. Xiang and J. Bauhus 576–583
