

AUSTRALIAN JOURNAL OF BOTANY

A journal for papers in ecology and ecophysiology; conservation biology and biodiversity; forest biology and management; cell and molecular biology; palaeobotany; reproductive biology and genetics; mycology and pathology; and structure and development

Contents Volume 58 Issue 3 2010

Ecology and Ecophysiology

Effects of fire, post-fire defoliation, drought and season on regrowth and carbohydrate reserves of alpine snowgrass *Poa fawcettiae* (Poaceae).
A. D. Tolsma, K. G. Tolhurst and S. M. Read 157–168

Aboveground biomass of functional groups in the ground layer of savannas under different fire frequencies.
Marcus Vinicius Cianciaruso, Igor Aurélio da Silva and Marco Antônio Batalha 169–174

Climate relationships with tree-ring width and $\delta^{13}\text{C}$ of three *Callitris* species from semiarid woodlands in south-western Australia.
Ciaran Sgherza, Louise E. Cullen and Pauline F. Grierson 175–187

Using growth-form attributes to identify pre-settlement woodland trees in central NSW, Australia.
Peter G. Spooner, Ian D. Lunt and Lisa Smallbone 188–197

Conservation Biology and Biodiversity

Histology of organogenesis and somatic embryogenesis in excised root cultures of an endangered species *Tylophora indica* (Asclepidaceae).
Aastha Sahai, Anwar Shahzad and Shiwali Sharma 198–205

High genetic diversity in a clonal relict *Alexgeorgea nitens* (Restionaceae): implications for ecological restoration.
Elizabeth Sinclair, Siegfried Krauss, Belinda Cheetham and Richard Hobbs 206–213

Size-class structure and variation in seed and seedling traits in relation to population size of an endangered species *Craigia yunnanensis* (Tiliaceae).
Zerui Gao, Changqin Zhang and Richard I. Milne 214–223

Structure and Development

Ontogenetic, anatomical and histochemical study of the vextrafloral nectaries of *Sapium biglandulosum* (Euphorbiaceae).
Ítalo Antônio Cotta Coutinho, Vânia Maria Moreira Valente and Renata Maria Strozi Alves Meira 224–232

Structure and histochemistry of the stigmatic and transmitting tissues of *Rodriguezia venusta* (Orchidaceae) during flower development.
Carlos André E. Leitão and Angelo L. Cortelazzo 233–240
