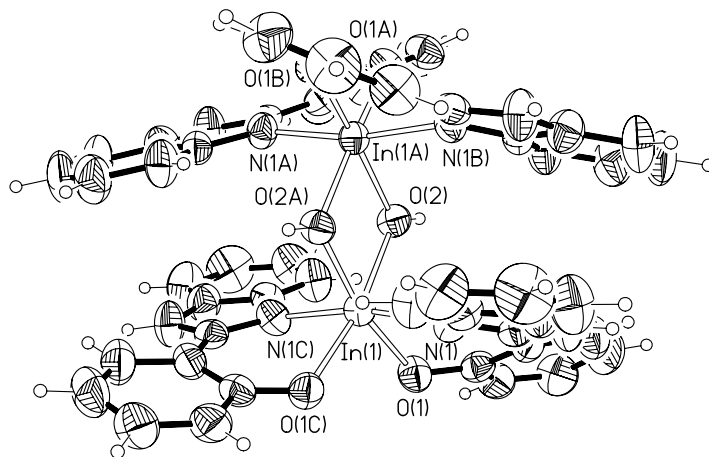

Figure A1. Perspective view of the molecular structure of **2**. Thermal ellipsoids are plotted at the 50 % probability level. Symmetry codes: ^A 1-x, 1-y, z; ^B 1-y, 1-x, -z; ^C y, x, -z.

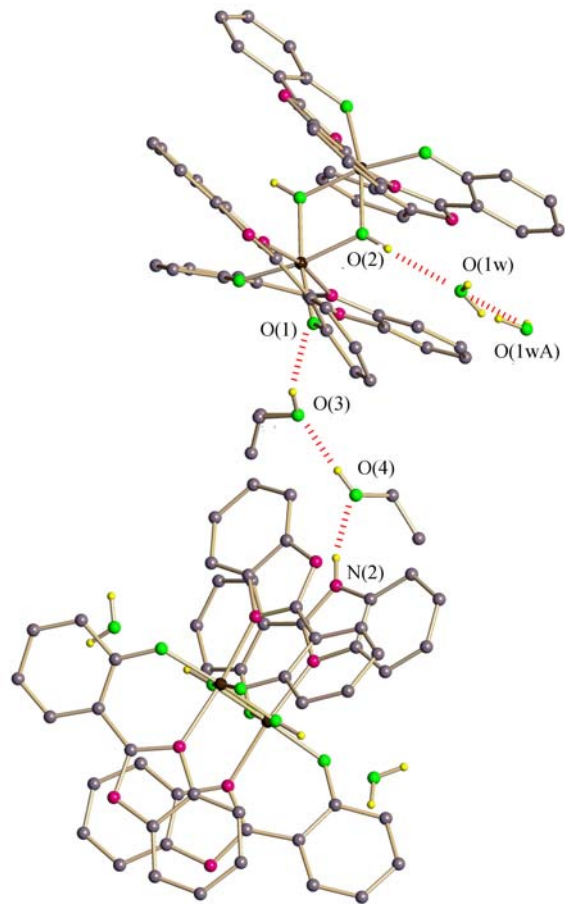

Figure A2. Perspective view of hydrogen bond interactions in **1** and **2**.

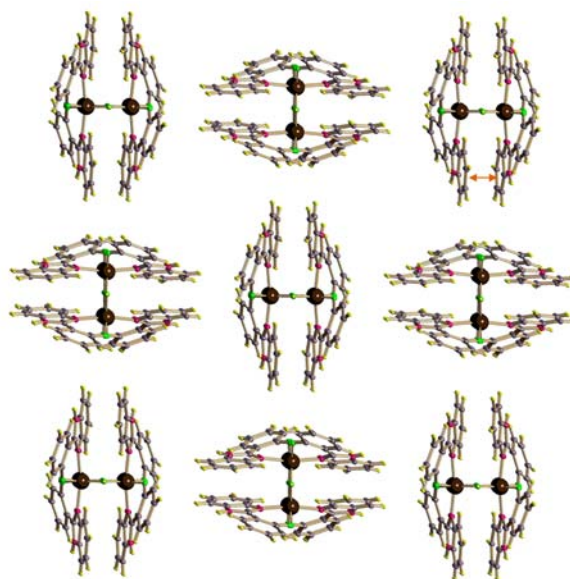

Figure A3. The molecular packing pattern in **1** and **2**. The inter-planar distance for the intramolecular π - π interaction is ca. 3.31 and 3.57 Å, respectively. For clarity, the lattice ethanol and water molecules are omitted.

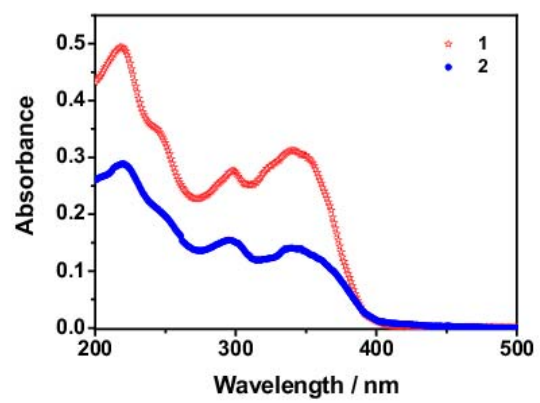

Figure A4. The UV-vis spectra for **1** and **2** in solid state.
