

A step towards a [2.2]paracyclophane: A single-crystal-to-single-crystal reaction involving a hydrogen-bonded molecular assembly with multiple reaction centers.

Tomislav Friščić and Leonard R. MacGillivray*

Department of Chemistry, University of Iowa

Iowa City, IA

52242-1294, USA

Supplementary Information

Figure F1. ^1H NMR spectra of cocrystals of 2(2)·2(3): a) before irradiation; b) after 36 hours irradiation with 420 nm wavelength radiation and c) after 48 hours irradiation with light from a 500 W high-pressure broadband mercury lamp.
