The images depict Differential Scanning Calorimetry (DSC) scans of two different compounds. The graphs show the thermal behavior of each compound with respect to temperature. The graphs include information on integral values, onset and peak temperatures, and heating rates. The compounds are illustrated with molecular structures, and their thermal properties are highlighted. The graphs are labeled with relevant data points indicating the phase transitions and thermal effects. The data is displayed in a readable format, with all necessary information clearly visible in the images.
NNOO22

Integral: 618.43 ml
normalized: 2132.50 Jg⁻¹
Onset: 272.09 °C
Peak: 262.51 °C
Heating Rate: 5.00 °Cmin⁻¹

Lab: METTLER

NNOO22

Integral: 9.88 ml
normalized: 36.59 Jg⁻¹
Onset: 252.73 °C
Peak: 256.87 °C
Heating Rate: 5.00 °Cmin⁻¹

Lab: METTLER
