

## CORRIGENDUM

VOLUME 23, NUMBER 9

*"The Theory of Titration of Polybasic Acids."* Part II, by S. D. Hamann, pp. 1749-65.

In Section III(e) of the above paper, the factor 0.5 of equation (35) was inadvertently omitted in the subsequent calculations. The general conclusions are unaffected, but the curves in Figure 5 should lie closer together; the values  $m$  of the ratio  $16/f_e^2$  in the third row of Table 5 should be changed to  $4m^{1/2}$  and the values of  $1/\beta$  in the second row altered by about the same amount.
