

Acknowledgements

We would like to gratefully acknowledge the CSIRO Publishing team, especially Ted Hamilton, who very professionally converted all our laptop computer writings to both a 'hard copy' book and a collection of PDF files.

As with John's first four books for Asian small holder dairy farmers, our gratitude also goes out to ATSE Crawford Fund, headed in Victoria by Ted Hayes, who provided generous financial support for this and all John's previous books. This support has allowed us to make this book freely available to anyone keen to better understand how dairy stock interact among themselves and with their 'keepers'.

The photograph standards in Chapter 6 were kindly provided by Ton van Schie, Publisher, Roodbont Agricultural Publishers, Zutphen, The Netherlands, from their published books *Cow Signals* and *Cow Signals Checkbook*, Vetvice/Roodbont Publishers B.V. (www.roodbont.com www.roodbont.nl).

Ms Kate Blaszak, of World Society for Protection of Animals, Sydney, provided relevant information from her studies of dairy cow welfare in Asian smallholder dairy farms.

Dr Jan Hulsen, of Vetvice, Bergen op Zoom, Netherland, provided us with valuable insights in cow behaviour, cow signals and how they relate to cow wellbeing. He was the author of the two key books on *Cow Signals*. Some of the pictures were supplied by:

Meat & Livestock Australia

Kate Blaszak

Philip Schultz

Denise Burrell

Roodbont Agricultural Publishers, Zutphen, Netherland

We are also grateful to our team of peer reviewers who provided their thoughts on how to make the book more readable to both technical and lay people readers.
