

Exploration Geophysics

The Bulletin of the Australian Society of Exploration Geophysicists

- Marine seismic profiling and shallow marine sand resistivity investigations in Broken Bay, NSW, Australia
Julian Vrbancich, Robert J. Whiteley, Peter Caffi and Don W. Emerson 227

- Applications of property modelling from 2D seismic data to reservoir identification and sealing potential for petroleum exploration and CO₂ sequestration
Hadi Nourollah 239

- Mapping anthropogenic fill with GPR for unmarked grave detection: a case study from a possible location of Mokare's grave, Albany, Western Australia
Paul Bladon, Ian Moffat, David Guilfoyle, Alice Beale and Jennifer Milani 249

- The Narrabeen Group in the east-central Sydney Basin: physical properties and interpretation
Donald W. Emerson and David F. Branagan 258

- Automated compilation of pseudo-lithology maps from geophysical data sets: a comparison of Gustafson-Kessel and fuzzy *c*-means cluster algorithms
Hendrik Paasche and Detlef Eberle 275
