Table S1. Procedural limits of detection (LOD, mg kg⁻¹) of the methods used in the analysis of plant and soil samples.

Element	LOD (mg kg ⁻¹) for plant samples	LOD (mg kg ⁻¹) for soil samples
Na	5.3	-
K	6.4	-
Ca	43	-
Mg	3.5	1.66
Al	1.1	2.6
Ti	0.37	0.86
V	0.15	0.56
Cr	0.11	0.18
Mn	0.57	0.13
Fe	2.9	1.66
Co	0.035	0.011
Cu	0.24	0.058
Zn	16	13
As	0.034	0.076
Sr	0.48	0.74
Mo	0.16	0.10
Cd	0.018	0.024
Ba	0.14	0.13
Tl	0.0077	0.014
Pb	0.077	0.13

Table S2. Certified values (in mg kg⁻¹) of the reference materials used to check the quality of the analytical methods for plant (SRM 1570a) and soil (ERM CC-141) samples.

The certified values for the ERM CC-141 material refer to the *aqua regia* extractable contents. The trueness (as % of recovery) and precision (as relative standard deviation, RSD, %) obtained after replicate analysis (n = 20 for the ERM CC-141; n = 22 for the SRM 1570a) of the reference materials are also included. The concentration of some of the elements of interest is not certified in one or both of the CRMs.

SRM 1570a				ERM CC-141		
Element	Certified value (mg kg ⁻¹)	RSD (%)	Recovery (%)	Certified value (mg kg ⁻¹)	RSD (%)	Recovery (%)
Al	310 ± 11	7	95	-	-	-
V	0.57 ± 0.03	8	88	-	-	-
Mn	75.9 ± 1.9	6	95	387 ± 17	10	85
Co	0.39 ± 0.05	7	83	7.9 ± 0.9	9	75
Pb	-	-	-	32.2 ± 1.4	8	87

Cr	-	-	-	31 ± 4	10	75

Table S3. Concentration (mg kg⁻¹) of 17 elements measured in soils (n = 5) during the two years of study (2013-2014).

Grapevine varieties, Hondarrabi Zerratia, Hondarrabi Zuri and Riesling, are expressed with acronyms, OZZ, OZ and R, respectively. All the concentrations were above the limits of detection (LOD, see Table S1). Soils from Riesling variety were not taken in May 2013, due to technical problems to access to the vineyard.

Table S6. Concentration (mg kg⁻¹) of 20 elements measured in different plant organs (roots, leaves, flowers and grapes, n = 5) of Riesling variety during the two years of study (2013-2014).

<LOD = below the limit of detection (see Table S1). Samples from May 2013 were not taken due to phytosanitary works carried out at the same time in the area. Sampling in October 2014 was also not possible due to technical problems to access to the vineyard.
