Method of preparation:

Many issues of *The Emu* gave an actual publication date (either on the final page or in the subsequent index for the volume) in addition to a date on the title page or cover of the issue. Where two or more dates appear, this table includes the later of the two dates since this must be assumed to be the more accurate. Where just one date was given, that is the 'specified date' referred to in Article 21 of the International Code of Zoological Nomenclature which states 'The date of publication specified in a work is to be adopted as correct in the absence of evidence to the contrary'. No further research has been conducted to see whether any delays to publication occurred beyond the stated dates.

This list is provided because priority of publication can be scientifically important. The authors of this table are publishing these dates in an account on *The Emu* that will appear in a book being prepared for The Ray Society that is due for publication in 2011. That book explains the dating of scientific names in ornithology and will report upon a considerable number of books and periodicals known to be difficult to date or to be frequently misdated and which contained names new to science.

Since 2001 no date other than the year has appeared on printed copies of *The Emu*. The dates in the table for those issues have been provided by CSIRO publishing from their records. As the International Code of Zoological Nomenclature does not acknowledge the date of online publication during this period, the date of print rather than online publication has been used.
