AP. 1. Preparation of vertebral centrum of white shark for X-radiograph. (a) A whole centrum. (b) Sagittally cut half centrum. (c) Transversely half centrum. (d) One fourth of a centrum consisting of corpus calcareum and intermedialia. (e) Corpus calcareum removed intermedialia. Corpus calcareum (e) was photographed with X-radiography. Arrows show the process of the preparation using a diamond saw and whetstones.

AP. 2. Relationship between total length (TL) and centrum radius (CR) in white sharks from Japan.
