CONTENTS

Do large rock lobsters inhibit smaller ones from entering traps?
A field experiment
T. F. Ihde, S. D. Frusher and J. M. Hoenig 665

Regional and local species diversity patterns for lotic invertebrates across multiple drainage basins in Victoria
R. Marchant, D. Ryan and L. Metzeling 675

Limited grazing pressure by native herbivores on the invasive seaweed Caulerpa taxifolia in a temperate Australian estuary
J. R. Gollan and J. T. Wright 685

Habitat use by caridean shrimps in lowland rivers
A. J. Richardson and R. A. Cook 695

Germination characteristics of Melaleuca ericifolia Sm. (swamp paperbark) and their implications for the rehabilitation of coastal wetlands
R. W. Robinson, P. I. Boon and P. Bailey 703

Age, growth and preliminary estimates of maturity of bigeye tuna, Thunnus obesus, in the Australian region

Aquatic geochemistry of the rare earth elements and yttrium in the Pioneer River catchment, Australia
M. G. Lawrence, S. D. Jupiter and B. S. Kamber 725

Density, habitat use and behaviour of the weedy seadragon Phyllopteryx taeniolatus (Teleostei: Syngnathidae) around Sydney, New South Wales, Australia
J. Sanchez-Camara, D. J. Booth, J. Murdoch, D. Watts and X. Turon 737

Seeding small numbers of cultured black-lip abalone (Haliotis rubra Leach) to match natural densities of wild populations
P. J. Goodsell, A. J. Underwood, M. G. Chapman and M. P. Heasman 747

Robinson et al. (p. 703) investigate the conditions for successful germination of Melaleuca ericifolia. A successful invader in other continents, in its native range it is a priority candidate for the rehabilitation of degraded coastal wetlands.
