<i>Masked Wood-Swallow ...</i>	—	—	March 20	April 5	—
<i>Hooded Robin</i>	—	—	“ 30	March 13	April 8
	—	—	“ 30	“ 13	“ 8
	—	—	—	—	—

Occasionally a few pairs of Flame-breasted Robins breed in the forest, but do not stay here with the brood through the summer. Other migrants are :—*Circus gouldi* (Harrier), arriving generally in October and leaving in early autumn ; also Grass-Warbler (*Cisticola exilis*), arrives in December and leaves in February ; the Snipe (*Gallinago australis*) arrives in September and leaves in March ; the Straw-necked Ibis (*Geronticus spinicollis*) is a regular visitor from February to June and August ; and the Stubble Quail (*Coturnix pectoralis*) from either October or November to April. *Petraeca bicolor* (Hooded Robin) is a regular visitor each November, but irregular in numbers—some seasons very few, others very plentiful.
