Special issue on chronic disease and climate change

Guest editorial

109 Chronic disease and climate change: understanding co-benefits and their policy implications

Introduces the issue which presents Australian perspectives of the co-benefits for health of action to mitigate climate change.

Anthony G. Capon, Chris E. Rissel

114 The public health benefits of reducing greenhouse gas emissions

Presents the rationale behind the *Lancet* series of papers describing the health co-benefits of action to mitigate climate change.

Andrew Haines

115 Air quality and chronic disease: why action on climate change is also good for health

Argues why action to reduce greenhouse gas emissions by improving energy efficiency, mass transit and active transport options has the potential for health benefits by improving air quality.

Martine Dennekamp, Marion Carey

122 The co-benefits for health of investing in active transportation

Discusses the health benefits and co-benefits of investing in policies and interventions to increase active transport.

Billie Giles-Corti, Sarah Foster, Trevor Shilton, Ryan Falconer

128 NSW Premier's Council for Active Living

Introduces this intersectoral Council which promotes initiatives to increase physical activity in NSW.

Peter McCue

129 Climate change, food insecurity and chronic diseases: sustainable and healthy policy opportunities for Australia

Examines food insecurity in Australia and how changes to the food system to mitigate climate change could improve dietary options and reduce chronic disease.

Sharon Friel

134 The Healthy Built Environments Program: a joint initiative of the NSW Department of Health and the University of NSW

Introduces this new Program which will foster interdisciplinary research and action to improve health through the built environment.

Susan M. Thompson, Andrew Whitehead, Anthony G. Capon

139 Mind, body, spirit: co-benefits for mental health from climate change adaptation and caring for country in remote Aboriginal Australian communities

Discusses the potential social and emotional wellbeing benefits of caring for country projects for Aboriginal Australians living in remote communities.

Helen L. Berry, James R. A. Butler, C. Paul Burgess, Ursula G. King, Komla Tsey, Yvonne L. Cadet-James, C. Wayne Rigby, Beverley Raphael

Bug Breakfast in the Bulletin

146 Biosecurity and infectious diseases

Sarah M. Potter, Vitali Sintchenko, Christian Enemark

Factsheet

148 Murray Valley encephalitis

Communicable Diseases Report, NSW

150 March and April 2010
