

PACIFIC CONSERVATION BIOLOGY

Volume 14

Number 4

Contents

EDITORIAL	
Forum on Conservation. <i>H. F. Recher.</i>	228
EDITOR'S FORUM	
Regenesis: A Discourse on the Natural History of Mind and Creation in the Second Deluge. <i>H. Finn.</i>	230
Key Role for Geoscientists in Providing "Early Warning System" on Environmental Crises. <i>P. Cawood.</i>	231
Why are we still using a "one size fits all" philosophy for systematic reserve planning in Australia? <i>J. Watson, R. A. Fuller and L. Barr.</i>	233
Thirty years later, should we be more concerned for the ongoing invasion of Mozambique Tilapia in Australia? <i>R. G. Doupé and D. W. Burrows.</i>	235
Nauru — Opportunity in loss. <i>S. Feary.</i>	238
Eucalypt decline and dead trees: if it's not sexy few seem to care. <i>P. D. Meek.</i>	240
Rock anchoring in Karimun Jawa, Indonesia: Ecological impacts and management implications. <i>J. A. Maynard, K. R. N. Anthony, S. Afatta, L. F. Anggraini and D. Haryanti, Ambariyanto.</i>	242
What Role Do Threatened Species Lists Play in New Zealand Conservation? <i>J. Ocock.</i>	244
Integrated pest management: an under-utilized tool for conservation and the management of invasive ants and their mutualistic Hemiptera in the Pacific. <i>P. J. Lester.</i>	246
An Indigenous-led Community Challenge to Fisheries Management in New Zealand: the Revival of Regional Scale Management Practices? <i>A. L. H. Whyte, J. J. Bell, K. M. Ramstad and J. P. A. Gardner.</i>	248
RESEARCH PAPERS	
Ecosystem conservation in multi-tenure reserve networks: the contribution of land outside of publicly protected areas. <i>J. A. Fitzsimons and G. Wescott.</i>	250
Bushfire and the Malthusian guillotine: survival of small mammals in a refuge in Nadgee Nature Reserve, south-eastern New South Wales. <i>D. Lunney, H. W. M. Lunney and H. F. Recher.</i>	263
Towards restoration of Hawaiian tropical dry forests: the Kaupulehu outplanting programme. <i>S. Cordell, M. McClellan, Y. Yarber Carter and L. J. Hadway.</i>	279
<i>Pacific Conservation Biology</i> : an authorship and citation analysis. <i>M. C. Calver and K. A. Bryant.</i>	285
Index of Contents	304

Papers submitted to *Pacific Conservation Biology* are individually and fully peer reviewed by a minimum of two referees. Referees are independent of the editorial board and are chosen for their expertise in the subject area of the paper submitted. In addition, papers are vigorously reviewed and edited by the editorial board. Nonetheless, the views put by authors are their own and do not necessarily reflect those of the editors or the Publisher.

COPYRIGHT

Submission of a paper to *Pacific Conservation Biology* will be taken to imply that it presents original unpublished work, not under consideration for publication elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature, and translations.

Permission to publish illustrations must be obtained by the author before submission and any acknowledgements should be included in the captions.

Authors of papers in *Pacific Conservation Biology* should be subscribers to the journal. Please indicate whether one or more of the authors is a subscriber. Not subscribing will not affect the publication of the paper. However, whereas subscribers (provided they are subscribers at the time of submitting their manuscript) receive a free pdf and do not pay page charges, non-subscribers do not receive pdf files and will be asked to pay a nominal AUD\$20 per printed page. These charges will be invoiced when page proofs are sent to authors. If they do not receive grant or institutional support for publication, contributors may request an exemption from page charges but they will pay a nominal charge for their pdf file if required. This is similar to procedures followed by other journals, including the Australian Ecological Society and the Royal Society of Western Australia in the publication of their journals. Authors may accelerate publication of their papers to the next available issue without penalty to other authors by paying full page charges of AUD\$65 per page. This still represents a significant publication subsidy. For your convenience subscription forms have been enclosed. If you already subscribe, assist the conservation of biodiversity in the Pacific Region by encouraging a colleague or library to subscribe.

ON FRONT COVER: Abandoned rock anchor (a) and characteristic scar (b). Scale bars equal 30 cm. Refer to page 242.
